Media And Globalization:

The Media and Globalization Terhi Rantanen, 2004-12-01 This is a necessary and very original book that really does address the lack of attention to media in previous discussions about globalization James Lull San Jose State University There is practically no globalization without media and communications Yet this relationship is so obvious it is often overlooked Rantanen challenges conventional ways of thinking about globalization and shows it cannot be understood without studying the role of the media This book offers a clear and accessible overview of globalization and the pivotal role of the media an introduction to the concepts and theories of globalization empirical data on the production and consumption of media a methodology for relating individual local experiences to the global picture Rantanen has made this complex and huge subject very accessible by using personal histories and pictures to engage the reader It will be invaluable to students in international media cultural studies communications and international relations

Media and Globalization Nancy Morris, Silvio Ricardo Waisbord, 2001 This study examines the converging culture telecommunications and new media industries in North America With a broadly political economic perspective this work goes on to provide an account of changes in the aftermath of trade agreements and sets these changes in a global context

The Myth of Media Globalization Kai Hafez, 2013-07-08 The ongoing interconnection of the world through modern mass media is generally considered to be one of the major developments underpinning globalization This important book considers anew the globalization phenomenon in the media sphere Rather than heralding globalization or warning of its dangers as in many other books Kai Hafez analyses the degree to which media globalization is really taking place Do we have enough evidence to show that there is a linear and accelerated move towards transnationalization in the media All too often the empirical data presented seems rather more anecdotal than representative Many transborder media phenomena are overestimated and taken out of the context of locally and nationally oriented mainstream media processes all over the world The inherent danger is that a central paradigm of the social sciences rather than bearing scholarly substance will turn out to be a myth and even a sometimes dangerously ideological tool Based on a theoretical debate of media globalization the work discusses most major fields of media development including foreign reporting satellite TV film internet foreign broadcasting media and migration media policy and media economy As an important new contribution to timely debates *The Myth of Media Globalization* will be essential and provocative reading for students and scholars alike

The Myth of Media Globalization Kai Hafez, 2007-03-26 The ongoing interconnection of the world through modern mass media is generally considered to be one of the major developments underpinning globalization This important book considers anew the globalization phenomenon in the media sphere Rather than heralding globalization or warning of its dangers as in many other books Kai Hafez analyses the degree to which media globalization is really taking place Do we have enough evidence to show that there is a linear and accelerated move towards transnationalization in the media All too often the empirical data presented seems rather more anecdotal than representative

Many transborder media phenomena are overestimated and taken out of the context of locally and nationally oriented mainstream media processes all over the world. The inherent danger is that a central paradigm of the social sciences rather than bearing scholarly substance will turn out to be a myth and even a sometimes dangerously ideological tool. Based on a theoretical debate of media globalization, the work discusses most major fields of media development including foreign reporting, satellite TV, film, internet, foreign broadcasting, media and migration, media policy, and media economy. As an important new contribution to timely debates, *The Myth of Media Globalization* will be essential and provocative reading for students and scholars alike.

Globalization, Cultural Identities, and Media Representations Natascha Gentz, Stefan Kramer, 2012-02-01. *Globalization, Cultural Identities, and Media Representations* provides a multidirectional approach for understanding the role of media in constructing cultural identities in a newly globalized media environment. The contributors cover a wide range of topics from different geopolitical areas, historical periods, and media genres. Case studies examined include the shift from print to Internet, local representations of modern world cinema, and global television narrative strategies in transnational literature and cultural economics of the mediation of world music in India, China, Algeria, Israel, Europe, and the United States. This case study approach allows for deeper insights into the complexity of each cultural subsystem as part of the whole media culture system. This book exemplifies a transcultural and transdisciplinary dialogue that maps out new relocalized territories and borders for mediated cultural identities and also reveals the complexity and connectedness of all of these discourses.

Globalization and Media Jack Lule, 2011-11-15. This lively and accessible book argues for the central role of media in understanding globalization. Indeed, Jack Lule convincingly shows that globalization could not have occurred without media. From earliest times, humans have used media to explore, settle, and globalize their world. In our day, media have made the world progressively smaller as nations and cultures come into increasing contact. Decades ago, Marshall McLuhan prophesied that media technology would transform the world into a global village. Slowly, fitfully, his vision is being fulfilled. The global village, however, is not the blissful utopia that McLuhan predicted. Nor in a more modern formulation is the world flat with playing fields leveled and opportunities for all. Instead, Lule argues, globalization and media are combining to create a divided world of gated communities and ghettos, borders and boundaries, suffering and surfeit, beauty and decay. By breaking down the economic, cultural, and political impact of media and through a rich set of case studies from around the globe, the author describes a global village of Babel, invoking the biblical town punished for its vanity by seeing its citizens scattered, its language confounded, and its destiny shaped by strife.

The New Communications Landscape Anura Goonasekera, Jan Servaes, Georgette Wang, 2003-09-02. The innovative and rapid growth of communication satellites and computer-mediated technologies in the late 1980s and early 1990s, combined with the deregulation of national broadcasting, led many media commentators to assume that the age of national media had been lost. But what has become clear is that whilst there has been a limited growth in global media, there has been an emergence of a strong localised

television and communications industry Mapping the world media market and using examples of programming from countries as diverse as Thailand Hong Kong Brazil Taiwan Spain and Britain this volume explores theories of media globalization examines the local culture of television programming and analyses the blurring of distinctions between the global and the local

Communications Media, Globalization, and Empire Oliver Boyd-Barrett, 2007-02-20 An exploration of the political economy of media and to what extent global communications and popular entertainment continue to serve elite interests In *Communications Media Globalization and Empire* an international team of experts analyzes and critiques the political economy of media communications worldwide Their analysis takes particular account of the sometimes conflicting pressures of globalization and neo imperialism The first is commonly defined as the dismantling of barriers to trade and cultural exchange and responds significantly to lobbying of the world s largest corporations including media corporations The second concerns US pursuit of national security interests as response to terrorism at one level and at others to intensifying competition among both nations and corporations for global natural resources

Global Media Joe Straubhaar, John Jirik, Shanti Kumar, 2015-10-08 The authors take as their starting point the assumption that media can only be analyzed in the context of the political economic cultural and technological conjunctures in which they develop are produced distributed and consumed Therefore the focus of this book is on ownership regulation production distribution and consumption of different electronic media radio television film the Internet at the global level including the various sub levels transnational cultural linguistic regional national and local which constitute the global The critical textbook develops a new theory of media globalization investigates the often very different paths and degrees of globalization of the four main extant forms of electronic mass media film radio television and the Internet analyzes how media globalization plays out in the BRIC countries Brazil Russia India and China to assess local national and regional characteristics of media globalization within the broader theoretical and political economic cultural and technological contexts introduced in parts I to III of the book While the authors believe that on one level the dominance of the global media system embedded in the power of Hollywood and the US military industrial entertainment complex must be recognized as a reality today they also see that a multi polar world is developing and that more attention must be played to developing countries if the emerging trajectory in media globalization

is to be recognized tracked and understood Thus this text pays special attention to the BRIC countries because despite a great deal of economic analysis of their potential to change or perhaps even dominate the future global media landscape little has been written about them as a group in media studies Aimed at upper level undergraduate and beginning postgraduate students this text will offer a sophisticated wide ranging introduction to global media in the twenty first century The Globalization of Corporate Media Hegemony Lee Artz,Yahya R. Kamalipour,2003-08-28 A volume in the SUNY series in Global Media Studies Yahya R Kamalipour and Kuldip R Rampal editors **The Globalization of Corporate Media Hegemony** Lee Artz,Yahya R. Kamalipour,2003-08-28 Shows how dominant commercial media practices secure a hold among and affect diverse national cultures Globalization, Development and the Mass Media Colin Sparks,2007-11-20 Globalization Development and the Mass Media gives a comprehensive and critical account of the theoretical changes in communication studies from the early theories of development communication through to the contemporary critiques of globalization It examines two main currents of thought Firstly the ways in which the media can be used to effect change and development It traces the evolution of thinking from attempts to spread modernity by way of using the media through to alternative perspectives based on encouraging participation in development communication Secondly the elaboration of the theory of media imperialism the criticisms that it provoked and its replacement as the dominant theory of international communication by globalization **Understanding Global Media** Terry Flew,2018-03-03 This key textbook provides a comprehensive and up to date account of developments in international communication worldwide Taking a comparative approach to the major theories of global media Terry Flew looks at the rise of global media production networks and the emergence of media cities multiculturalism and the question of a global media culture This engaging book raises the question of whether we are now in a post global age and discusses whether there is a stable global communications order or instead a stage of increased competition among digital and traditional media and between the US and emergent powers such as China Drawing on a wide range of perspectives and written by a renowned author this is an essential introduction for undergraduate and postgraduate students of media studies communication studies and cultural studies and anyone interested in the study of media and globalization *The Transformation of the Media* Nick Stevenson,1999 Combining a theoretical with an empirical approach this is an analysis of structural change in the global media and its cultural consequences The key issues for the 1990s are covered such as the media globalization identity and technology **Global Media** Edward Herrmann,Robert W. McChesney,2001-08-27 Describes in detail the most recent rapid growth and cross border activities and linkages of an industry of large global media conglomerates *China's Media Go Global* Daya Kishan Thussu,Hugo de Burgh,Anbin Shi,2017-11-30 As part of its going out strategy China is using the media to promote its views and vision to the wider world and to counter negative images in the US dominated international media China s Media Go Global the first edited collection on this subject evaluates how the unprecedented expansion of Chinese media and

communications is changing the global media landscape and the role of China within it. Each chapter examines a different dimension of Chinese media's globalization from newspapers, radio, film and television to social media and journalism. Topics include the rise of Chinese news networks, China Daily as an instrument of China's public diplomacy and the discussion around the growth of China's state media in Africa. Other chapters discuss entertainment television, financial media and the advertising market in China. Together, this collection of essays offers a comprehensive evaluation of complex debates concerning the impact of China on the international media landscape and makes a distinctive addition to Chinese media studies as well as to broader global media discourses. Beyond its primary readership among academics and students, *China's Media Go Global* is aimed at the growing constituency of general readers for whom the role of the media in globalization is of wider interest.

Media and Politics in a Globalizing World Alexa Robertson, 2015-03-17 Globalization and technological advances have had a dramatic impact on the relationship between media and politics. How can we understand the connection between the two in the present day? Alexa Robertson argues that we cannot understand the power of the one without taking the other into account. This exciting and accessible book provides fresh insight into our contemporary media landscape, adopting a truly comparative global approach. In *Media and Politics in a Globalizing World*, Robertson encourages the reader to explore the relationship from different perspectives: those of the politician, the journalist, the activist and the ordinary citizen, and how the relationship between media and politics varies across cultures. Illustrated with contemporary examples throughout, the book weighs up arguments for seeing new developments in terms of change or continuity, as empowering or debilitating, and as promoting or undermining democracy. Suitable for undergraduates and postgraduates studying politics, media and sociology, it also will be of interest to the general reader wishing to understand the complex role of the media in political life the world over. The Transformation of the Media Nicholas Stevenson, 2014-06-06 The changing pattern of contemporary media is one of the most striking and important transformations of our age. This major new work seeks to understand the implications of a series of mediated processes in relation to public cultures and modern identities. In *The Transformation of the Media*, the author leads the reader through a number of complex theoretical issues connecting the nature of modern communication to the affects this has on our common moral and ethical lives. Most significantly, he argues that a number of perspectives as diverse as Marxism, postmodernism, liberalism, communitarianism and technological determinism can all be found wanting in this regard. *The Transformation of the Media* attempts to situate the media and more theoretical concerns within a broad sociological framework. The volume adds to our shared understanding of the media's relation to contemporary cultural transformations, including globalisation, the development of informational capitalism, the changing nature of the public sphere and the impact of new social movements. More specifically, through a discussion of the new media order and the Rwandan genocide, a critical prism is held up to existing debates concerning the globalisation of the media. Key features: an extremely

topical and accessible analysis of the media's implications for contemporary cultural transformations combines a theoretical and empirical approach presents complex theoretical ideas in an accessible way This book will be essential reading for students studying globalisation the global media new media technology identity and cultural development in cultural studies media studies and sociology and politics courses
