focus on ethical issues that might be encountered by health practitioners in training in practice and in management. It is also interactive and case based encouraging readers to reflect on their current and future areas of practice. The concluding chapters discuss the role of moral theory and give practical models for ethical decision making. The authors have developed a holistic approach that explores ethics in hospital and community settings, interdisciplinary teamwork, ward and hospital management, nursing research, performance management and the political ethics of nursing administration, health service restructuring and reform. The content has been substantially revised for this edition and significant new material added to reflect developments in theory and practice. Covers a wide range of ethical issues much more than just clinical dilemmas and decision making skills. A down to earth and practical approach to applied ethics. User friendly layout. Material on moral theory kept to a minimum but dealt with thoroughly. At the end of the book focuses on ethical issues in nursing and case studies taken from nursing practice i.e. the concrete concerns of nurses and other front line workers. Pedagogical features include chapter aims, learning outcomes and further reading for possible essay, tutorial and project topics. Also useful as a general work of reference on ethics in health care. An up to date analysis of professions in the context of modernity to enable health professionals to make sense of global cultural social developments. An analysis of the ethics of evidence based practice. An examination of professional accountability and ethics in performance management to help practitioners/managers understand the ethical basis of management.
