Peace Culture And Society Elise Boulding, Clovis Brigagao, Kevin Clements, 2019-06-04 1989 certainly represents one of those moments yet when IPRA held its 12th General Conference in August 1988 few of the participants imagined that within the space of 13 months popular social movements would topple socialist regimes in Poland Czechoslovakia Hungary and the German Democratic Republic Nobody imagined the Berlin wall or the wire fence between Hungary and Austria being dismantled Even fewer contemplated the overthrow of the Ceausescu regime in Rumania pluralistic politics in Bulgaria a single German economy or a reunited Germany

Communication and Culture in War and Peace Colleen Roach, 1993-02-01 Roach provides an excellent account of the contributions of feminist peace researchers to the analysis of cultural militarism and its twin cultural violence against women Altogether this book is a worthy enterprise that will help both activists and scholars gain a more in depth understanding of the barriers to change erected by the media s use of information technology and will be useful in developing scenarios and strategies for the creative use of that technology for peaceful social transformation Elise Boulding in Media Development Does the media have a perverse fascination with war and violence Do television newspapers and magazines neglect the forces of peace in favor of the more dramatic war machines thereby amplifying the guns rather than muting them If so how does media coverage reflect the culture for which it works By exploring the role of both culture and mass media this volume fills a crucial void in the study of war and peace Outstanding scholars provide a history and overview of critical mass media research and investigate emerging issues dealing with the ongoing debate over communication in war and peace Several chapters deal specifically with the role of communication culture in the Gulf War while others discuss more general themes including the military industrial communication complex cultural imperialism and transnational control of communication Many of the essays offer a uniquely feminist reading of war and peace a perspective typically unacknowledged in mainstream communication work This timely book also weaves peripheral concerns like multiculturalism international communication law women and peace and communication technology into the primary themes of media and war The research and practical information given here will be useful for courses in peace and conflict studies international mass communication and intercultural communication Professionals in international relations negotiations and the media will find this book to be both fascinating and illuminating Original research on the coverage of disarmament stories and peace issues in Canadian dailies and Vincent Mosco s excellent blueprint for converting the military machine to a peace system give Roach s work practical and positive dimensions Abstracts at the beginning of the chapters full bibliographies and a preface by the father of peace

civilization and the biosphere are threatened by catastrophic climate change Unless rapid steps are taken to replace fossil fuels by 100% renewable energy we risk passing a tipping point beyond which uncontrollable feedback loops could produce a 6th extinction event comparable to those observed in the geological record Another serious threat to human civilization and the biosphere is the danger of a catastrophic thermonuclear war Over a long period of time there is an ever increasing risk that such a war will occur by accident or miscalculation Thirdly there is threat of an extremely serious and widespread famine produced by the climate change rapidly growing populations and the end of the fossil fuel era We must urgently address all three challenges

important new school in the field of postcold war international relations Constructivists assume that interstate and interorganizational relations are always at some level linguistic contexts Thus they bridge IR theory and social theory This book explores the constructivist approach in IR as it has been developing in the larger context of social science worldwide with younger IR scholars building anew on the tradition of Wittgenstein Habermas Luhman Foucault and others The contributors include Friedrich Kratochwil Harald Muller Matthias Albert Jennifer Milliken Birgit Locher Dodge and Elisabeth Prugl Ben Rosamond Nicholas Onuf Audie Klotz Lars Lose and the editors

Civil Resistance Kurt Schock, 2015-08-15 In the past quarter century the world has witnessed dramatic social and political transformations due in part to an upsurge in civil resistance There have been significant uprisings around the globe including the toppling of communist regimes in Eastern Europe the Color Revolutions the Arab Spring protests against war and economic inequality countless struggles against corruption and demands for more equitable distribution of land These actions have attracted substantial scholarly attention reflected in the growth of literature on social movements and revolution as well as literature on nonviolent resistance Until now however the two bodies of literature have largely developed in parallel with relatively little acknowledgment of the existence of the other In this useful collection an international and interdisciplinary group of scholars takes stock of the current state of the theoretical and empirical literature on civil resistance Contributors analyze key processes of nonviolent struggle and identify both frictions and points of synthesis between the narrower literature on civil resistance and the broader literature on social movements and revolution By doing so Civil Resistance Comparative Perspectives on Nonviolent Struggle pushes the boundaries of the study of civil resistance and generates social scientific knowledge that will be helpful for all scholars and activists concerned with democracy human rights and social justice

Civilization's Crisis: A Set Of Linked Challenges John Scales Avery, 2017-04-20 Modern civilization faces a broad spectrum of daunting problems but rational solutions are available for them all This book explores the following issues 1 Threats to the environment and climate change 2 a growing population and vanishing resources 3 the global food and refugee crisis 4 intolerable economic inequality 5 the threat of nuclear war 6 the military industrial complex and 7 limits to growth These problems are closely interlinked and their possible solutions are discussed in this book

The Need for a New Economic System John Scales Avery, 2016-02-07 It is clear that our present economic system is unsustainable Never ending exponential industrial growth on a finite planet is a logical absurdity We are already using resources at a rate which it would take 1 6 planet earths to replace We are already undermining the ecological systems which support all of life Our present economic system has led to an unbelievable degree of economic inequality To maintain this inequality both between nations and within nations military force is used and democracy is replaced by oligarchy The future of human civilization is endangered both by the threat of thermonuclear war

and by the threat of catastrophic climate change and both of the twin threats are results of our present economic system This book documents in detail the serious economic problems of today s world and it also proposes sustainable solutions

Space-Age Science and Stone-Age Politics John Scales Avery,2016-02-07 Space age science and stone age politics make an extraordinarily dangerous mixture It seems probable that in the future the rapidity of scientificand technological change will produce ethical dilemmas and social tensions even more acute than those we experience today It is likely that the fate of our species and the fate of the biosphere will be made precarious by the astonishing speed of scientific and technological change unless this progress is matched by the achievement of far greater ethical and political maturity than we have yet attained

The Meaning of Environmental Security Jon Barnett,2001 This book is a comprehensive critical discussion of the new idea of environmental security Jon Barnett looks at links between environmental degradation and national security But the meaning of the concept is ambiguous and an examination of its various interpretations and applications reveals much about the state of global environmental politics Barnett argues that environmental security is ultimately driven more by the power of security makers than by the need to address environmental problems By systematically uncovering the deficiencies of existing discourses he develops an alternative critical Green approach with practical implications
