Peace Education Evaluation Celina Del Felice, Aaron Karako, Andria Wisler, 2015-05-01 Practice and research of peace education has grown in the recent years as shown by a steadily increasing number of publications programs events and funding mechanisms The oft cited point of departure for the peace education community is the belief in education as a valuable tool for decreasing the use of violence in conflict and for building cultures of positive peace hallmarked by just and equitable structures Educators and organizations implementing peace education activities and programming however often lack the tools and capacities for evaluation and thus pay scant regard to this step in program management Reasons for this inattention are related to the perceived urgency to prioritize new and more action in the context of scarce financial and

human resources notwithstanding violence or conflict the lack of skills and time to indulge in a thorough evaluative strategy and the absence of institutional incentives and support Evaluation is often demand driven by donors who emphasize accounting given the current context of international development assistance and budget cuts Program evaluation is considered an added burden to already over tasked programmers who are unaware of the incentives and of assessment techniques Peace education practitioners are typically faced with forcing evaluation frameworks techniques and norms standardized for traditional education programs and venues Together these conditions create an unfavorable environment in which evaluation becomes under valued de prioritized and mythologized for its laboriousness This volume serves three inter related objectives First it offers a critical reflection on theoretical and methodological issues regarding evaluation applied to peace education interventions and programming The overarching questions of the nature of peace and the principles guiding peace education as well as governing theories and assumptions of change transformation and complexity are explored Second the volume investigates existing quantitative qualitative and mixed methods evaluation practices of peace educators in order to identify what needs related to evaluation persist among practitioners Promising practices are presented from peace education programming in different settings formal and non formal education within various groups e g children youth police journalists and among diverse cultural contexts Finally the volume proposes ideas of evaluation novel techniques for experimentation and creative adaptation of tools from related fields in order to offer pragmatic and philosophical substance to peace educators next moves and inspire the agenda for continued exploration and innovation The authors come from variety of fields including education peace and conflict studies educational evaluation development studies comparative education economics and psychology

EDUCATION FOR WORLD PEACE Issues, Challenges and New Directions Dr. Santosh Kumar Behera, Lamina Kamiludeen Omotoyosi, *Critical Peace Education* Peter Pericles Trifonas, Bryan Wright, 2012-10-09

Forward thinking pedagogues as well as peace researchers have in recent decades cast a critical eye over teaching content and methodology with the aim of promulgating notions of peace and sustainability in education This volume gives voice to the reflections of educational theorists and practitioners who have taken on the task of articulating a curriculum of difference that gives positive voice to these key concepts in the pedagogical arena Here contributors from around the world engage with paradigm shifting discourses that reexamine questions of ontology and human subjectivity discourses that advocate interdisciplinarity as well as the reformulation of epistemological boundaries Deconstructing the origins and limits of human knowledge and learning the book affords educators the opportunity to identify and express common elements of the subjects taught and studied in educational institutions elements that facilitate students apprehension of peace and sustainability With penetrating analysis of contemporary issues in the field this volume introduces a range of fresh theoretical approaches that extend the boundaries of peace education which is broadly defined as promoting the responsible equitable and sustainable co existence of differing human communities In doing so the chapters show how we

can improve our lives as well as our chances of survival as a species by acknowledging the importance of shared human aspirations that cut across borders of genuinely listening to alternative voices and opinions of challenging the ubiquitous socially constructed historical narratives that define human relations only in terms of power Charged with vitality and originality this new publication is a critical examination of issues central to the development and utility of global education
