Peace An Idea Whose Time Has Come:

Peace Anatol Rapoport, 2025-10-01 In *Peace An Idea Whose Time Has Come* noted mathematician and peace researcher Anatol Rapoport explores the evolution of the idea of peace and explains why it is displacing war as a viable institution Professor Rapoport ventures into uncharted philosophical territory by drawing on both the natural and the social sciences to trace the development of the ideas of war and peace He argues that the theory of evolution and processes analogous to natural selection can explain not only biological events but also the development of the institution of war Thus the clashes of armed hordes at the dawn of history were the ancestors of our present battles using automated weapons while Isaiah's prophecy of total disarmament And they shall beat their swords into ploughshares anticipates the resolutions of the United Nations Rapoport explains that although the institution of war enjoys a long history and continues to be a policy option today it may soon fall into disuse either by losing its relevance to modern life or by destroying the civilizations that practice it He then calls attention to ideas that lie dormant until people's ideational environment becomes receptive to their germination peace Anatol Rapoport believes is one such idea Peace continues in the interdisciplinary tradition that has taken root in inquiries at the nexus of science and philosophy No specific technical knowledge is expected of the reader only a willingness to venture into little charted areas of thought

An Idea Whose Time Has Come Todd S. Purdum, 2014-04-01 The story of the behind the scenes political battle to pass the 1964 Civil Rights Act Excellent a highly readable play by play The Atlantic It was a turbulent time in America a time of sit ins freedom rides a March on Washington and a governor standing in the schoolhouse door when John F Kennedy sent Congress a bill to bar racial discrimination in employment education and public accommodations Countless civil rights measures had died on Capitol Hill in the past But this one was different because as one influential senator put it it was an idea whose time has come In this revealing book Todd S Purdum tells the story of the Civil Rights Act of 1964 recreating the legislative maneuvering and the larger than life characters who made its passage possible From the Kennedy brothers to Lyndon Johnson from Martin Luther King Jr to Hubert Humphrey and Everett Dirksen Purdum shows how these all too human figures managed in just over a year to create a bill that prompted the longest filibuster in the history of the US Senate yet was ultimately adopted with overwhelming bipartisan support He evokes the high purpose and low dealings that marked the creation of this monumental law drawing on extensive archival research and dozens of new interviews that bring to life this signal achievement in American history an example in our own troubled time of what is possible when bipartisanship decency and patience rule the day Brilliantly rendered and emotionally powerful a riveting account of one of the most dramatic and significant moments in American history Doris Kearns Goodwin Today's reader will be startled if not astonished by how the bill made its way through Congress The Washington Post Worthy timely and intelligent The New Yorker A first rate narrative The Wall Street Journal **Peace**, 1992 *An Idea Whose Time Has Come* National Conference of Christians and Jews, 1944 The Origins of Violence Anatol Rapoport, 2020-02-18 In this

fundamental analysis Rapoport asks Why do we have wars Doesn't humanity always seem on the verge of self annihilation Is there something in human genetic structure that makes people want to kill each other Perhaps this impulse is a matter of good versus evil or just plain human nature Rapoport moves beyond cliches by claiming that the sources of modern violence reside in the imbalance between a lag in the system of values inherited from the past and the structure of science and technology that awaits no revision of values to move ahead As a result Rapoport argues that the study of war and peace should be considered a science just like biology or for that matter political science The same rules of empirical engagement and experimentation should apply Before we can have a theory of peace we need a methodology of conflict Using the writings of thinkers who have made significant contributions to the predominant ideas and ideals of our society Rapoport weaves together the strands of independent thought and research into a single thought provoking work After investigating the whys of violence using ideological psychological strategic and systemic perspective Rapoport moves to an in depth analysis of possible varieties of conflict resolution He explores such mechanisms as mediation education and applying the results of scientific research He documents the impact of ideologies countervailing dominant ones that place obstacles in the way of peacemaking Rapoport argues that conciliation and game theories can be utilized to replace the concept of winner take all or total victory The Origins of Violence is a needed contribution to our understanding of warfare and provides a forward looking perspective that can be of wide use to each of the policy sciences starting with military strategy and ending with international development

Brunstetter,Jean-Vincent Holeindre,2018-01-10 How do we frame decisions to use or abstain from military force Who should do the killing Do we need new paradigms to guide the use of force And what does victory mean in contemporary conflict In many ways these are timeless questions But they should be revisited in light of changing circumstances in the twenty first century The post Cold War post 9 11 world is one of contested and fragmented sovereignty contested because the norm of territorial integrity has shed some of its absolute nature fragmented because some states do not control all of their territory and cannot defeat violent groups operating within their borders Humanitarian intervention preventive war and just war are all framing mechanisms aimed at convincing domestic and international audiences to go to war or not as well as to decide who is justified in legally and ethically killing The international group of scholars assembled in this book critically examine these frameworks to ask if they are flawed and if so how they can be improved Finally the volume contemplates what all the killing and dying is for if victory ultimately proves elusive **Nobel Lectures in Peace** Frederick W.
