that they receive from institutional conservatives in the GOP and affiliated organizations the United States is experiencing an upsurge in left wing social movements unlike any other in the past half century with roots not in the Democratic Party but Occupy Wall Street and Black Lives Matter Drawing on his original reporting as well as archival research O Connor investigates how the capitalist class and the radical right mobilize racism to defend their interests while focusing on one of the most pressing issues of our time immigration

**To Be an American** Bill Ong Hing,2000

The impetus behind California's Proposition 187 clearly reflects the growing anti immigrant sentiment in this country Many Americans regard today's new immigrants as not truly American as somehow less committed to the ideals on which the country was founded In clear precise terms Bill Ong Hing considers immigration in the context of the global economy a sluggish national economy and the hard facts about downsizing Importantly he also confronts the emphatic claims of immigrant supporters that immigrants do assimilate take jobs that native workers don't want and contribute more to the tax coffers than they take out of the system A major contribution of Hing's book is its emphasis on such often overlooked issues as the competition between immigrants and African Americans inter group tension and ethnic separatism issues constantly brushed aside both by immigrant rights groups and the anti immigrant right Drawing on Hing's work as a lawyer deeply involved in the day to day life of his immigrant clients *To Be An American* is a unique blend of substantive analysis policy and personal experience

*From Black to Biracial* Kathleen Korgen,1998-02-24 Is a person with both a white and African American parent black Thirty years ago in American society the answer would have been yes Today the answer most likely depends on whom you ask According to the U S Census a person with both a black and a white parent is in fact black However most young persons who fit this description describe themselves as biracial both black and white Most young Americans whatever their racial background agree Since the Voting Rights Act of 1965 signaled the culmination of the Civil Rights Movement a transformation has occurred in the racial self definition of Americans with both an African American and a white parent This book describes the transformation and explains why it has occurred and how it has come about Through extensive research and dozens of interviews Korgen describes how the transformation has its roots in the historical and cultural transitions in U S society since the Civil Rights era A ground breaking book *From Black to Biracial* will help all Americans understand the societal implications of the increasingly multiracial nature of our population From affirmative action to the present controversy over the U S Census 2000 the repercussions of the transformation in racial identity related here affect all race based aspects of our society Students and faculty in sociology and multicultural studies business leaders

**Handbook of the Sociology of Education** Maureen T. Hallinan, 2006-11-24 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social system

**The Sociology of Community**

**Connections** John G. Bruhn, 2011-07-18 Many of our current social problems have been attributed to the breakdown or loss of community as a place and to the fragmentation of connections due to an extreme value of individualism in the Western world particularly in the United States Not all scholars and researchers agree that individualism and technology are the primary culprits in the loss of community as it existed in the middle decades of the 20th century Nonetheless people exist in groups and connections are vital to their existence and in the daily performance of activities The second edition of the Sociology of Community Connections will identify and help students understand community connectedness in the present and future
