Conference,2000 Peace was far from a pale static concept a simple lack of violence in the Middle Ages and Renaissance Rather it was at times constructed as a rich and complex positive and dynamic ideal The thirteen articles in this volume cover a broad range of disciplines times and geographical areas and explore strategies that were used in the past to resolve conflict and attain peace They examine events texts and images that date from the fifth through the sixteenth centuries and their authors focus not only on Western Europe but also on Scandinavia the Caucasus and Egypt This volume rests on the assumption that peace covers a spectrum of situations that connects the personal and the political Therefore the papers presented here examine not only how nations negotiated peace but also how individuals did Similarly although several essays spotlight those in the seat of power others explore those who are politically marginalized our views about peace and conflict as this collection makes clear are shaped in part by the mentalites of the past Although some peacemaking strategies may be unacceptable to us today forced marriages and conversions for example we can learn from other strategies how to transcend or modify various modes of antagonistic thinking A Guide to the Study of Medieval History for Students, Teachers, and Libraries Louis John Paetow,2015-11-03 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to
