Gordon Melton,Martin Baumann,2010-09-21 This masterful six volume encyclopedia provides comprehensive global coverage of religion

emphasizing larger religious communities without neglecting the world's smaller religious outposts. *Religions of the World* Second Edition A Comprehensive Encyclopedia of Beliefs and Practices is an extraordinary work bringing together the scholarship of some 225 experts from around the globe. The encyclopedia's six volumes offer entries on every country of the world with particular emphasis on the larger nations as well as Indonesia and the Latin American countries that are traditionally given little attention in English language reference works. Entries include profiles on religion in the world's smallest countries, the Vatican and San Marino; profiles on religion in recently established or disputed countries, Kosovo and Nagorno Karabakh; as well as profiles on religion in some of the world's most remote places, Antarctica and Easter Island. *Religions of the World* is unique in that it is based in religion on the ground, tracing the development of each of the 16 major world religious traditions through its institutional expressions in the modern world, its major geographical sites and its major celebrations. Unlike other works, the encyclopedia also covers the world of religious unbelief as expressed in atheism, humanism and other traditions.

Human Technology Ilchi Lee, 2005. Ilchi Lee, author of *Healing Society*, presents a toolkit for self-reliance management of the core issues of life, health, sexuality, and life purpose. Meditation, breath work, and Oriental healing arts are offered as self-reliant health management skills. A distinctive perspective on relationships and an inspirational guide to discover a passionate life purpose are featured. This book also includes a practical guide to optimize our life's master controller, the brain. In the name of comfort and security, we have created increasingly complex systems that demand our lives for their maintenance. Systems cannot answer life's most important questions; only you can. The ultimate goal of education, institutions, and expertise should be self-education. Only then will technology serve humanity rather than reign over us. *Human Technology* contains the principles and tools that can return us to self-mastery and the life well-lived. *Human Technology* is a toolkit for living an authentic life.
