In this stunning book historian of science Charlotte Sleight draws on the ultimate bibliophile's menagerie the collections of the British Library to present a lavishly illustrated homage to this historical collaboration between art and science Gathering together a breathtaking range of nature illustrations from manuscripts prints drawings and rare printed books from across the world Sleight brings us face to face or face to tentacle with images of butterflies beetles and spiders of shells fish and coral polyps Organized into four themed sections exotic native domestic and paradoxical the images introduce us to some of the world's most renowned natural history illustrators from John James Audubon to Mark Catesby and Ernst Haeckel as well as to lesser known artists In her accompanying text Sleight traces the story of the art of natural history from the Renaissance through the great age of exploration and into the nineteenth century offering insight into the changing connections between the natural and human worlds But the story does not end there From caterpillars to crabs langurs to dugongs stick insects to Old English pigs from the sinuous tail feathers of birds of paradise to the lime green wings of New Zealand's enormous flightless parrot the kakapo from the crenellated plates of a tortoise's shell to imagined likenesses of unicorns mermaids and dinosaurs the story continues in this book It is a Paper Zoo for all time **Chambers's Scientific Reader**
