known laws of physics to be mutually consistent the universe must diverge to infinite computational power as it collapses into a final cosmological singularity termed the Omega Point The theorem is an intrinsic component of the Feynman DeWitt Weinberg quantum gravity Standard Model Theory of Everything TOE describing and unifying all the forces in physics of which itself is also required by the known physical laws With infinite computational resources the dead can be resurrected never to die again via perfect computer emulation of the multiverse from its start at the Big Bang Miracles are also physically allowed via electroweak quantum tunneling controlled by the Omega Point cosmological singularity The Omega Point is a different aspect of the Big Bang cosmological singularity the first cause and the Omega Point has all the haecceities claimed for God in the traditional religions From this analysis conclusions are drawn regarding the social ethical economic and political implications of the Omega Point cosmology

His shoulders are broad His feet seem as blocks His hands appear gentle His face reveals no features The eyes are felt rather than seen Surrounding the light that clothes Him is an aura of light blue Behind Him a deep blue goes back forever He is the Beginning and the End and has decided the moment when time shall stop The rebuilding of the Temple is the key to all of it The actual events like the war in Iraq the 11th September the terror all over the world and the campaign of the UN and other powers in the world to take Jerusalem and parts of the Biblical land of Israel are actually the opening stages of the end time war and all of it is focused on Israel and Jerusalem as G d shared with us in prophecy The Temple Mount and Land of Israel Faithful Movement Published April 2003
