democratic parties within the new liberal democratic order This book employing the period 2001-03 for its detailed analysis suggests that this uniqueness is best understood as either an expression of eastern German national sentiment or as deriving from a reinterpretation of Marxism attuned to the interests of a democratic twenty first century society and the book explores these alternative understandings in turn Noting both the historic distinctiveness of German capitalism and the contradictions within German communism it concludes that the PDS now fused in Die Linke remains nourished by the particularism of eastern Germany

A Tale of Three Cities Barbara Czarniawska-Joerges, 2002 Cities are complex sprawling diverse places They are organized but disorganized managed but unmanaged orderly but disorderly Modern metropolitan cities reproduce themselves and we are familiar with the common icons that are replicated in every part of the globe but how should we understand cities For the past five years Professor Czarniawska has been leading a research project on globalization and the management of cities Rather than seeing the city

as a conurbation or a location of economic activity or in terms of governance and administration Czarniawska explores the city as an action net An action net of this sort includes various organizations municipal state private and voluntary and non organized individuals Such an approach was designed to avoid the fallacy of viewing the big city as one big organization The city is thus conceived as a particularly complex and disorderly action net a seamless web of interorganizational networks where the city administration proper constitutes just one point of entry and by no means provides a map of the entire terrain The research focuses on three European capitals Warsaw Stockholm and Rome At the outset leading politicians and officials in each city listed the major problems and projects that the city was engaged in for example environmental reforms improvement of public utilities privatization financial targets etc The author selected a number of these for more detailed study reporting upon interesting similarities and differences between the approaches taken The book aims to explore organizing processes in their local context while following the connections between such contexts
