Rahman,2003 An easily accessible source of information on the history politics economics society geography and culture of Bangladesh Contains an exhaustive bibliography for further study **Peasants and Globalization** A. Haroon

Akram-Lodhi,Cristóbal Kay,2012-08-21 In 2007 for the first time in human history a majority of the world s population lived in cities However on a global scale poverty overwhelmingly retains a rural face This book assembles an unparalleled group of internationally eminent scholars in the field of rural development and social change in order to explore historical and contemporary processes of agrarian change and transformation and their consequent impact upon the livelihoods poverty and well being of those who live in the countryside The book provides a critical analysis of the extent to which rural development trajectories have in the past and are now promoting a change in rural production processes the accumulation of rural resources and shifts in rural politics and the implications of such trajectories for peasant livelihoods and rural workers in an era of globalization Peasants and Globalization thus explores continuity and change in the debate on the agrarian question from its early formulation in the late 19th century to the continuing relevance it has in our times including chapters from Terence Byres Amiya Bagchi Ellen Wood Farshad Araghi Henry Bernstein Saturnino M Borrás Ray Kiely Michael Watts and Philip McMichael Collectively the contributors argue that neoliberal social and economic policies have in deepening the market imperative governing the contemporary world food system not only failed to tackle to underlying causes of rural poverty but have indeed deepened the agrarian crisis currently confronting the livelihoods of peasant farmers and rural workers This crisis does not go unchallenged as rural social movements have emerged for the first time on a transnational scale Confronting development policies that are unable to reduce let alone eliminate rural poverty transnational rural social movements are attempting to construct a more just future for the world s farmers and rural workers Classes, Citizenship and Inequality T. K. Oommen,2010 Rejecting the obsolete methodology of comparisons between categories Markets, Class and Social Change B. Crow,2001-10-10 At the beginning of the twenty first century an idealized view of markets informs government policy Real differences in how markets interact with social change are obscured and public action on poverty is constrained Markets Class and Social Change uses a detailed study of the grain trade in Bangladesh to show how socially constrained patterns of market involvement may systematically benefit the rich while disadvantaging the poor More generally the book suggests that markets are implicated in the making of society its divisions identities and directions
