at all levels and in places within Christendom Thirdly it places in dialogue interdisciplinary perspectives and approaches and evidence from philosophy history literature and material culture to the issues of money and church Lastly the volume provides new perspectives on the role of the church in the process of monetization in the High Middle Ages Concentrating on northern Europe from the early eleventh century to the beginning of the thirteenth century the collection is able to explore the profound changes in the use of money and the rise of a money economy that this period and region witnessed By adopting a multi disciplinary approach the collection challenges current understanding of how money was perceived understood and used by medieval clergy in a range of different contexts It furthermore provides wide ranging contributions to the broader economic and ethical issues of the period demonstrating how the church became a major force in the process of monetization
