Wals,2024-11-21 Responding to growing interest in the sustainable development goals SDGs and global concern over climate change this volume provides an analysis of how our understanding of the relationship between environment and education has evolved during the past 50 years Spanning from the 1972 United Nations Conference on the Human Environment through to the present day chapters examine whether our approach to education about environmental sustainability is enacting effective change Examining the evolution of educational approaches to environmental learning contexts and themes this book moves through the decades from the 1970s until the 2020s tracking the impact of historical events and shifting sustainability discourses within education Through historical research based analyses this book recognises patterns trends and countertrends that help critically re assess the potential of education in creating a world that is more sustainable than current scientific predictions estimate Proposing a set of key considerations for the future of environmental education this accessible book will be of value to scholars researchers policymakers and practitioners working within sustainability education environmental research and policy and teacher education more broadly The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Education for Sustainable Development in the 'Capitalocene' Helena Pedersen,Sally Windsor,Benjamin Knutsson,Dawn Sanders,Arjen Wals,Olof Franck,2023-09-25 The book seeks to explore ways in which education research policy and practice ought to be re thought and re enacted under present bio political predicaments It brings together scholars working in the intersections of education for sustainable development philosophy of education and curriculum theory who contribute original and radical analyses of education in an increasingly unpredictable and unintelligible world According to the Intergovernmental Panel on Climate Change IPCC humanity is closer to irreversible tipping points that once reached will lead to accelerating transformations that will drastically change life on earth during the coming decades Responses from education studies to these precarious social ecological conditions range from pointing out necessary ways forward for education grounded in human accountability responsibility justice ethics and care to dark ecology oriented interventions unnerving the very premises that education relies on When education is deeply entangled with and contributing to a catastrophic global development the idea of education as a nostalgic promise for a common good and a better future comes under scrutiny This volume re configures education as inextricable from other anthropogenic threats and natural forces that seem to become increasingly intertwined in joint production of our current predicament It urges educational theorists practitioners and policymakers to engage with thinking practicing and revolutionizing educational futures The chapters in this book were originally published in the journal Educational Philosophy and Theory

Post-Sustainability and Environmental Education Bob Jickling,Stephen Sterling,2017-03-17 This book provides a critique of over two decades of sustained effort to infuse educational systems with education for sustainable development Taking to heart the idea that deconstruction is a prelude to reconstruction this critique leads to discussions about how

education can be remade and respond to the educational imperatives of our time particularly as they relate to ecological crises and human nature relationships It will be of great interest to students and researchers of sociology education philosophy and environmental issues

Young people, education, and sustainable development Peter Blaze Corcoran, Philip M. Osano, 2023-09-04 Young people have an enormous stake in the present and future state of Earth Almost half of the human population is under the age of 25 If young people's resources of energy time and knowledge are misdirected towards violence terrorism socially isolating technologies and unsustainable consumption civilization risks destabilization Yet there is a powerful opportunity for society if young people can participate positively in all aspects of sustainable development In order to do so young people need education political support resources skills and hope This volume offers a global perspective on education initiatives by and for young people that promote a transition to sustainability It includes 38 essays co authored by 68 contributors from 25 nations representing a diversity of geography gender and generation The development of youth leadership has been a central concern of my professional work Young people have a lot to offer to sustainable development and should participate in planning for our planet's future This rich collection of theoretical and practical approaches captures the growing response of young people to this challenge I am particularly pleased with the attention paid to the role of often underrepresented regions of the world to the role of women and to the Earth Charter in the creating of a peaceful and sustainable future Julia Marton Lefevre Director General of IUCN International Union for Conservation of Nature and former Rector of the University for Peace This book is a rich global tapestry depicting the inter linkages among youth education and sustainable development What is particularly interesting is that it shows how education at all levels can be a powerful engine for promoting sustainability This work is an important contribution to the United Nations Decade of Education for Sustainable Development Goolam Mohamedbhai Secretary General Association of African Universities and Past President International Association of Universities This important and skillfully prepared book comes at a critical time A great strength of this volume is that it blends together theoretical and practical insights regarding education for sustainable development by and for young people It is written from diverse cultural perspectives from all world regions Readers from many fields especially young people and their teachers will find it timely and relevant I hope that it will inspire the younger generation to get involved in seeking solutions to the challenges we face James Gustave Speth Former Administrator of the United Nations Development Programme and Dean Emeritus of the School of Forestry and Environmental Studies at Yale University It is my hope that you are inspired as I have been by Young People Education and Sustainable Development Exploring Principles Perspectives and Praxis for the stories in this volume are full of the possibilities that emerge when we honor and support young people Ruud Lubbers Former Prime Minister of The Netherlands and past United Nations High Commissioner for Refugees

The Oxford Handbook of International Studies Pedagogy Heather A. Smith, Mark A. Boyer, David J. Hornsby, 2024 This volume on international studies pedagogy

helps us think purposefully about the worlds we teach to our students and it shows us why engaging in reflective practice about how and what we teach matters The Handbook also provides strategies to engage students in a variety of ways to reflect on and engage with the complexities of the world in which we live

International Handbook of Research on Environmental Education Robert B. Stevenson, Robert Stevenson, 2013 The environment and contested notions of sustainability are increasingly topics of public interest political debate and legislation across the world Environmental education journals now publish research from a wide variety of methodological traditions that show linkages between the environment health development and education The growth in scholarship makes this an opportune time to review and synthesize the knowledge base of the environmental education EE field The purpose of this 51 chapter handbook is not only to illuminate the most important concepts findings and theories that have been developed by EE research but also to critically examine the historical progression of the field its current debates and controversies what is still missing from the EE research agenda and where that agenda might be headed Published for the American Educational Research Association AERA

International Research on Education for Sustainable Development in Early Childhood John Siraj-Blatchford, Cathy Mogharreban, Eunhye Park, 2016-10-14 This book offers a perspective on Education for Sustainable Development in Early Childhood ESDEC that is far removed from the business as usual notion of an extended predominantly environmental educational curriculum for preschools It presents a vision of sustainable development that has relevance to Early Childhood Care and Education ECCE from birth to school it is relevant as much to homes family support and health settings as it is to educational settings and is as much concerned with health and wellbeing as with education The book provides a perspective that is fundamentally embedded in notions of interdependency It places an emphasis upon the importance of recognising the interdependency of peoples within and between nation states the ecological interdependencies of the natural world of humanity and nature and most significantly the interdependency of adults and children These emphases have their origins in the grassroots studies included in the ten chapters representing countries from around the world The book reflects the idea that only global solutions and initiatives are capable of addressing the global challenges of climate change environmental pollution and global threats to ecological systems and biodiversity

Education, Arts and Sustainability Mary Ann Hunter, Arnold Aprill, Allen Hill, Sherridan Emery, 2018-02-28 This book addresses this challenge by proposing an integration of sustainability and arts education in both principle and practice In a global context of intensifying social economic and environmental crises education is key to raising awareness and motivating individuals and communities to act in sustaining life in our more than human world But how is this done when the complexity and need for change becomes overwhelming and schooling systems become complicit in supporting the status quo Drawing on critical education theory and precepts of creativity curiosity and change it documents a series of case examples that demonstrate how five principles of Education for Sustainability critical thinking systems thinking community partnership participation and

envisioning better futures are found at the heart of much arts practice in schools Featuring the creative work and voices of teachers working in arts based enquiry and diverse community engaged contexts the book investigates how sustainability principles are embedded in contemporary arts education thinking and pedagogy The authors are unapologetically optimistic in forming an alliance of arts and sustainability education as a creative response to the challenge of our times arguing that while they may have operated on the margins of conventional pedagogy and curriculum they have more than marginal impact

Engaging People in Sustainability Daniella Tilbury, David Wortman, 2004 The book is based on the exchange of professional experiences which featured in an IUCN CEC workshop in August 2002 Practitioners from around the world shared their models of good practice and explored the challenges involved in engaging people in sustainability The difficulties facing practitioners vary between country and context but some challenges are universal A lack of clarity in communicating what is meant by sustainable development An ambition to educate everyone to bring about a global citizenship Social organisational or institutional factors constrain change to sustainable development yet there is an emphasis on formal education and community educators do not receive the same support A lack of balance in addressing the integration of environmental social and economic dimensions leading to an interpretation that ESD is mainly about environment and conservation issues New learning rather than teaching approaches are called for to promote more debate in society Yet few are trained or experienced in these new approaches Practitioners need support to explore new ways of promoting learning Foreword ed *Shaping the future we want* Buckler, Carolee, Creech, Heather, 2014-11-10

Towards Critical Environmental Education Aristotelis S. Gkiolmas, Constantine D. Skordoulis, 2020-11-03 This volume discusses theory philosophy praxis and methods in Environmental and Ecological education and considers the junction with the main visions and issues of Critical Pedagogy The volume and its separate chapters address four axes which can also be seen as the guidelines of the content as well as the central objectives of the book The first axis concerns the missing theoretical and practical pieces at this point in time The volume considers the issues that are not included in contemporary Environmental Education and thus deprive it from critical orientations This implies that in Environmental Education very little discussion exists about the political economic racial gender and class issues that in most cases govern the actions of leaders and stake holders The second axis concerns what has been done so far and in what directions This involves descriptions of theoretical approaches or actual applied methodologies in the classroom such as curricula or syllabus used or the kind of actions certain educators have taken to infuse the issues of justice and critical reflection within the Environmental Education teaching agenda The third axis examines proposals It looks at ways to enrich domains of Environmental Education with the argumentations of Critical Pedagogy The fourth axis concerns the way in which

proposals can be effectuated This part contains specific methodologies and teaching sequences depicting ways of including major aspects of Critical Pedagogy and Critical Education in Environmental Education Examples are Non anthropocentric ecological approaches in the classroom political activism in the Curricula mixture of field activities and political activities

Learning, Environment and Sustainable Development William Scott,Paul Vare,2020-11-11 This book is an introduction to the long history of human learning the environment and sustainable development about our struggles with the natural world first for survival then for dominance currently for self preservation and in future perhaps even for long term mutually beneficial co existence It charts the long arc of human environment relationships through the specific lens of human learning putting on record many of the people ideas and events that have contributed often unwittingly to the global movement for sustainable development Human learning has always had a focus on the environment It s something we ve been engaged in ever since we began interacting with our surroundings and thinking about the impacts outcomes and consequences of our actions and interactions This unique story told by the authors is episodic rather than a connected linear account it probes questions and re examines familiar issues from novel perspectives and looks ahead The book is of particular interest to those studying and teaching courses with a focus on socio economic and environmental sustainability and non governmental organisations whose work brings them face to face with the general public and social enterprises
