Pedagogic Practices, Student Engagement and Equity in Chinese as a Foreign Language Education Wen Xu, 2021-12-27 This book explores and analyses Chinese as a Foreign Language CFL pedagogic practices and learning experiences within a cohort of low socio economic status students within an Australian primary classroom It demonstrates that in spite of policy and educational discourses underpinning Asian literacies Chinese teaching and learning is a fragile undertaking in Australian schooling The politicisation of CFL education especially in the post COVID 19 era has exacerbated public stereotypes concerning racism and multiculturalism in Australia today Drawing upon Bernstein s theorisation and engagement framework Wen Xu sketches out CFL education as a democratic space where power and control relations can be deliberately operated to reinforce engaging learning experiences She suggests that pedagogic interventions in the name of social justice have the potential to make consequential differences in disadvantaged students life trajectories and CFL education can be envisioned as an avenue towards socioeconomic mobility instead of being criticised as a platform opposing to liberal ideas In turn she provides insights into teaching younger age CFL learners in the global context in terms of the structuring of pedagogy and curriculum Wen Xu s research will be of interest to students and scholars in sociology of education student engagement pedagogy and curriculum CFL education and languages education as well as pre service teachers and practitioners who teach Chinese as a Foreign Language

Disciplinary: Functional Linguistic and Sociological Perspectives

Frances Christie,Karl Maton,2011-02-03 Disciplinary knowledge is under threat in the modern world Claims abound that we are entering a landscape in which the division of disciplines is obsolete implying a commitment to outdated values in scholarship Notions of discipline are critiqued as reflecting social power and representing the worldview of dominant social groups By addressing and challenging such claims this edited collection argues that proclamations of the death of disciplines have been greatly overstated Not only are the notions of disciplinarity still important for understanding how we come to know the world but this volume demonstrates how significant disciplinarity is to understanding different forms of knowledge if we wish to improve the building of knowledge and educational practice Using analytical tools from systemic functional linguistics theory and social realist sociology this volume illustrates how different disciplines can collaborate and cross fertilize successfully without losing their distinctive insights and disciplinary integrity The subsequent theory developed will thereby extend both linguistic and sociological approaches to the topic and make a major contribution to educational theory

Lives And Relationships Yasuhiro Omi,Lilian Patricia Rodriguez,María Claudia Peralta-Gómez,2013-12-01 This book brings to cultural psychology the focus on phenomenology of everyday life Whether it is in the context of education work or exploration of life environments the chapters in this book converge on the need to give attention to complex realities of everyday living Thus a description of pre school organization in Japan would be in its form very different from school organization in Britain or Colombia yet the realities of human beings acting in social roles are continuous around the world
