Pedestrian Accidents:

Pedestrian Accident Reduction Guide United States. National Highway Traffic Safety Administration, 1981 This Pedestrian Accident Reduction PAR Guide provides guidelines for a successful pedestrian safety program at the local regional and state levels It also provides information about accident types and the countermeasures now available

Pedestrian Safety Daniel J Holt, 2004-01-01 A recent research report released by the U S Department of Transportation s National Highway Traffic Safety Administration NHTSA has stated that almost 175 000 pedestrians died on U S roadways between 1975 and 2001 It was also noted in the report that 12% of all deaths related to motor vehicle crashes in the country are pedestrian fatalities Most of the safety technology to date in vehicles has been applied to protect the occupants in the vehicle What can vehicle manufacturers do to reduce pedestrian fatalities With research being focused on two major fronts methods to sense the presence of pedestrians and warn drivers of their location and ways to design vehicles that can help not only adults of various age groups to survive an impact between them and a vehicle but also children that are smaller than most adults the technical papers in this SAE Progress in Technology Series book explore ways the automobile can be designed to help reduce fatalities and injuries when a pedestrian and vehicle meet during an impact Causative factors

and countermeasures for rural and suburban pedestrian accidents Richard L. Knoblauch, 1977 **Pedestrian Accidents**

Antony J. Chapman, Frances M. Wade, Hugh C. Foot, 1982

Investigation of Exposure Based Pedestrian Accident Areas, 1988 Previous FHWA research on pedestrian exposure identified four problem areas as promising candidates for accident reduction intersections without marked pedestrian crosswalks major arterial streets local streets and locations lacking sidewalks or pedestrian pathways This report describes the results of a project undertaken to examine those four problem areas The objectives of the project were to evaluate past research on pedestrian crosswalk markings and develop guidance for when and what type of crosswalk markings should be provided investigate traffic engineering improvements for major arterial streets to increase pedestrian safety investigate traffic engineering improvements for local streets to increase pedestrian safety and examine existing guidance warrants for the provision of pedestrian pathways and sidewalks and prepare revised guidance warrants Pedestrian and Cyclist Impact Ciaran Simms, Denis Wood, 2009-07-21 The aim of this

book is to present pedestrian injuries from a biomechanical perspective We aim to give a detailed treatment of the physics of pedestrian impact as well as a review of the accident databases and the relevant injury criteria used to assess pedestrian injuries A further focus will be the effects on injury outcome of 1 pedestrian vehicle position and velocity at impact and 2 the influence of vehicle design on injury outcome Most of the content of this book has been published by these and other authors in various journals but this book will provide a comprehensive treatment of the biomechanics of pedestrian impacts for the first time It will therefore be of value to new and established researchers alike *Pedestrian Accidents Occurring on*
