Everyday Ethics in the

Clinical Practice of Pediatrics and Young Adult Medicine, An Issue of Pediatric Clinics of North America, E-Book

Margaret R Moon, 2023-11-16 In this issue of Pediatric Clinics of North America guest editor Dr Margaret R Moon brings her considerable expertise to the topic of Everyday Ethics in the Clinical Practice of Pediatrics and Young Adult Medicine. Conflicting moral obligations abound in pediatric medicine; competence in identifying and managing ethical concerns is integral to competence in pediatrics. Because most of pediatric care occurs in the outpatient setting, ethical issues arise often in routine clinical practice. This first ever issue is devoted to medical ethics for the pediatrician, keeping in mind the rights and obligations of the physician, patient, and parent, as well as an understanding of widely accepted principles of medical ethics. Contains 11 practice-oriented topics including practical ethics for pediatricians, shared decision making in pediatrics, pediatrician as advocate and protector, balancing interests of children vs parents, collaborating with families on goals of care in a setting of medical complexity, and more. Provides in-depth clinical reviews on everyday ethics in the clinical practice of pediatrics and young adult medicine, offering actionable insights for clinical practice. Presents the latest information on this timely focused topic under the leadership of experienced editors in the field. Authors synthesize and distill the latest research and practice guidelines to create clinically significant topic-based reviews.

Deciding with Children in Pediatrics John Massie, Georgina Hall, Lynn Gillam, 2024-10-16 Deciding with Children in Pediatrics: Children's Participation in Healthcare Decision making provides the ethical underpinning and offers practical strategies to foster meaningful participation of children in decisions affecting their healthcare. It will assist clinicians to bring forward the perspectives and values of the child, ensuring their preferences are incorporated into decision making or appropriately justified when this is not possible. This is to both improve healthcare delivery and serve the best interests of children now and as decision makers in the future. This book reviews theories underpinning the concept of deciding with children and explores how pediatric decision making is standardly managed. It then proposes a model for making healthcare decisions with children. A panel of experienced clinicians and ethicists demonstrate via a series of case studies how to promote children's participation across a variety of clinical areas, child ages, and developmental stages. It concludes with a review of questions, concerns, and challenges. Deciding with Children in Pediatrics: Children's Participation in Healthcare Decision making helps bridge the gap between philosophy and practical clinical ethics and creates a frame of reference for children's healthcare providers. Presents philosophical, ethical, and human rights support for promoting child participation in their healthcare. Provides practical tools to help clinicians decide with children. Clarifies the limits of involving children in their healthcare.

Practical Strategies in Pediatric Diagnosis and Therapy Robert Kliegman, Larry A. Greenbaum, Patricia S. Lye, 2004 Approaches diagnosis and treatment the way clinicians do by symptom rather than disease entity. It combines clinical experience and evidence-based strategies to guide clinicians through differential diagnoses and then to a specific diagnosis, then to appropriate therapy for common pediatric ailments. A user-friendly, well-tabulated and illustrated format assists the reader in identifying the many disease
