This book is aimed at primary care providers who care for the pediatric age group: general pediatrician, the PCP working with pediatric patients, and family medicine providers with the goal of covering the endocrine differential diagnosis of common signs and symptoms of possible endocrine disease as well as appropriate initial laboratory evaluation and interpretation. The first section is organized by presenting signs and symptoms; the second section is organized by laboratory interpretation; and the third section provides summaries of common pediatric endocrine disorders. Chapters are concise, providing critical clinical information including clinical pearls, common diagnoses, and important points in patient counseling. Written by experts in the field, *Endocrine Conditions in Pediatrics* is a valuable resource that provides general pediatricians and other primary care providers with all of the information they need to provide superb patient care before transferring to a pediatric endocrinologist when necessary.
