Gadow, 2018-09-03 First published in 1986 The primary purpose of this book is to provide information about the use of medication for several childhood disorders that require long term treatment It is the author's expectation that this information will allow caregivers to make better decisions about the use of medication This title also examines the importance of evaluating various aspects when medicating a child including their characteristics their family situation and school setting      **Developmental-Behavioral Disorders** Marvin I. Gottlieb, John E. Williams, 2013-03-07 Child development has always been a traditional component of well child care and a particular area of interest for pediatricians child neurologists and psychologists However it was not until the early 1960s that children with developmental disabilities i.e. chronic handicapping disorders became a major focus of public and professional attention During this period children with special needs were dramatically catapulted into the limelight and exceptional became the buzzword of the day Public and professional awareness of these issues reached new peaks and recognition of the potential psychosocial impairments of children with developmental disabilities created national anxiety A variety of factors contributed to an unprecedented societal advocacy for children with developmental problems 1 a national concern generated by President Kennedy's particular interest in mental retardation 2 increased activity and visibility of parent advocacy lobbying groups e.g. the Association for Children with Learning Disabilities 3 the enactment of federal legislation designed to protect the rights of the handicapped e.g. PL94-142 and 4 the popularization of developmental behavioral disabilities by the various communications media Cumulatively these events precipitated a redefinition of the meaning of comprehensive health care for children resulting in an emphasis on the child's neurodevelopmental educational psychological and social needs For the pediatrician a myriad of new management responsibilities were mandated in addition to the traditional health care concerns      **Pediatric Epilepsy** Blaise F.
