Pediatric Ethics From Principles To Practice:

Pediatric Ethics - From Principles to Practice Harwood, **Pediatric Ethics - from Princ-** Cassidy, 1996-06-01
Pediatric Ethics has been written by experienced pediatric caregivers. All the most difficult and challenging pediatric issues are faced from truth telling for the child to confidentiality for the adolescent and from futility in intensive care to conflicting interests in the private office. This book has been specifically designed to enhance the practitioner's ability to identify, evaluate, and manage the real ethical problems that arise in caring for children and their families. **Pediatric Ethics** Alan R. Fleischman, 2016. This work examines the many ethical issues related to health care in children. It explores the moral obligations of families and clinicians facing hard choices for critically ill and dying children ranging from neonates to adolescents. It also addresses the ethical concerns in research, genetic testing and screening, and surgical and medical enhancement. *Pediatric Bioethics* Geoffrey Miller, 2010. This volume offers a theoretical and practical overview of the ethics of pediatric medicine. It serves as a fundamental handbook and resource for pediatricians, nurses, residents in training, graduate students, and practitioners of ethics and healthcare policy. Written by a team of leading experts, *Pediatric Bioethics* addresses those difficult ethical questions concerning the clinical and academic practice of pediatrics, including an approach to recognizing boundaries when confronted with issues such as end of life care, life sustaining treatment, extreme prematurity, pharmacotherapy, and research. Thorny topics such as what constitutes best interests, personhood, or distributive justice, and public health concerns such as immunization and newborn genetic screening are also addressed. Hospice Care for Children Ann Armstrong-Dailey, Sarah F. Zarbock, 2001. Children with life threatening and terminal illnesses and their families require a unique kind of care to meet a wide variety of needs. This book, the first edition of which won the 1993 Pediatric Nursing Book of the Year Award, provides an authoritative source for the many people involved in caring for dying children. It draws together contributions from leading authorities in a comprehensive, fully up to date resource with an emphasis on practical topics that can be put to immediate use. The book covers the entire range of issues related to the hospice environment and is intended for all those who participate in the hospice care process: physicians, nurses, social workers, teachers, clergy, family therapists, parents, and community service volunteers. **The Adolescent Alone** Jeffrey Blustein, Carol Levine, Nancy Dubler, 1999-07-13. A growing number of adolescents do not have a supportive and trusting relationship with an adult in a birth, foster, adoptive, or chosen family. Through a variety of circumstances, they are literally or functionally alone. Yet like all adolescents, they need routine and sometimes specialized health care. This book is a collection of essays, case studies, and guidelines that describe the demography, philosophical, medical, legal, and developmental framework in which these youth and health care staff confront medical decision making. The authors address questions of consent, confidentiality, access to care, and the right to refuse or demand care. Throughout, the emphasis is on the real world experience of adolescents as they struggle to overcome the challenges of being alone. Professionals who work with these

adolescents cannot replace their absent or disinterested families but can fulfill the critical role of trusted adult advisor

The Story of Bioethics Jennifer K. Walter, Eran P. Klein, 2003-10-08 This literally refreshing collection is based on the notion that the future of bioethics is inseparable from its past. Seminal works provide a unique and relatively unexplored vehicle for investigating not only where bioethics began but where it may be going as well. In this volume a number of the pioneers in bioethics: Tom Beauchamp, Lisa Sowle Cahill, James Childress, Charles E. Curran, Patricia King, H. Tristram Engelhardt, William F. May, Edmund D. Pellegrino, Warren Reich, Robert Veatch, and LeRoy Walters reflect on their early work and how they fit into the past and future of bioethics. Coming from many disciplines, generations, and perspectives, these trailblazing authors provide a broad overview of the history and current state of the field. Invaluable to anyone with a serious interest in the development and future of bioethics at a time when new paths into medical questions are made almost daily.

The Story of Bioethics is a Baedeker beyond compare. **Principles of Pediatric and Neonatal Emergencies** Panna
