Peer-mediated Instruction Peter S. Rosenbaum, 1973-01-01 *Peer Mediated Instruction Intervention* Sarah Terrell, 2018 **Peer-mediated Instruction and Intervention Through Integrated Play Groups Among Preschoolers with Autism** Sarah Al-Sharif, 2020 Teachers play an essential role in providing appropriate classroom interventions for young children with autism spectrum disorder ASD It is necessary to discover teachers perceptions about these interventions for young children with ASD in order to improve the curricula and standards for working with this population Peer Mediated Instruction and Intervention PMII has proven to be a successful evidence based intervention EBI that works to improve the social skills of children with ASD To date there is little research that has explored teachers perceptions of using PMII Therefore this study investigates teachers perceptions of the impact of using PMII in Integrated Play Groups IPG with particular regard to the social skills development among preschoolers with ASD within general education classrooms To best capture these perceptions the study was conducted using a survey research design *Effects of Peer Mediated Instruction on Students with Behavior Disorders* Wendy Locke, 1996 Peer-mediated Instruction and Interventions Supporting the Academic Engagement of Secondary Students with Autism Spectrum Disorder Michael W. M. Mahoney, 2019 This study examined the use of a peer mediated instruction and intervention model PMI in combination with priming and the use of a visual activity checklist as a way of supporting the academic engagement and social interactions of secondary students with autism spectrum disorder ASD This study employed the use of a multiple baseline across participants design Kazdin 2011 to determine the effects of the multicomponent intervention on the academic engagement and social interactions of students with ASD enrolled in 10th grade general education settings Results showed positive outcomes for all three 10th grade students academic engagement and in social interactions for two of the three participants This study adds to the literature in supporting the academic engagement of students with ASD by incorporating the use of priming and activity schedules within a PMI model Findings from this study address the call for multicomponent interventions supporting links between academic and social skills in adolescents with ASD **Essentials of Evidence-Based Academic Interventions** Barbara J. Wendling, Nancy Mather, 2008-11-19 *Essentials of Evidence Based Academic Interventions* puts at your fingertips the successful instructional techniques and materials necessary for accurate and effective use of evidence based interventions Written by Barbara Wendling and Nancy Mather two experts in educational assessment and intervention this intervention oriented reference presents clear descriptions of research based interventions in the areas of phonological awareness and beginning reading phonics phonics and sight word instruction reading fluency vocabulary and reading comprehension spelling handwriting and written expression basic math skills and math problem solving *The Effects of Reinforcement*

and Peer-mediated Instruction on the Task Engagement of Children with Disabilities in Preschool Inclusion Setting Lauren Elizabeth Mae Johnson, 2021 This study examined the effects of reinforcement and peer mediated instruction on student with disabilities task engagement in a preschool inclusion setting The target student participants were selected to participate because they typically played alone and showed a need for the intervention according to their classroom teachers The peer model participants were selected because they demonstrated success with social skills such as cooperative play and joint attention while attending to an activity After baseline data were collected peer models completed behavior skills training for prompting instruction At the conclusion of each session of training a probe was completed to assess the amount of prompts each participant prompted in a 5 minute session The criteria to move onto the intervention was to have each peer prompt 5 total times in one session Criteria was met and each participant pair completed the intervention A multiple baseline across participant pairs was used to evaluate the effectiveness of the intervention Findings indicated reinforcement and peer mediated intervention improved the task engagement for students with disabilities

Integrated Lifecycle Services for Persons with Disabilities David L. Lovett, Kathryn A. Haring, 2012-12-06 The field of education is under pressure both external and internal to improve the services provided to all students In American society and elsewhere there is a concern that current educational practices fail to adequately prepare many students to be productive citizens There has been a call for educational services that are more responsive to the needs of students that use effective educational practices that involve parents and the local community and that adequately prepare teachers to assume more professional roles Over the last several decades special educators have addressed these and other critical issues as they relate to students with disabilities The knowledge gained from these endeavors can be useful in the reshaping of schools for all students those with disabilities and those without Indeed this information may be useful for services beyond school whether for young children or adults This volume has been written to address how people with disabilities can be effectively served in settings with their nondisabled peers Because many of the students who are not well served by current educational practices have similar needs as students with disabilities it is anticipated that some of this information may be useful in the discussion regarding the reshaping of educational systems It is also anticipated that the material presented will help in the design of more effective coordinated systems that serve people with disabilities throughout their lives
