and the general reader      The Truth Please! Edward Cross,2012-03 The things I ve written about in this book reflect my approach to life that approach is common sense The scientific laws Ive written about are proven facts of science that can be found elaborated on in numerous sources and the Bible verses are I ve quoted are right out of the King James Version Bible Whether looking at science the Bible or how to build a house I want to know what makes sense Certainly all answers to life are not simple but there is no reason to accept complicated nonsense for an answer if by common sense the question can be reasoned and answered I was nominated for an appointment to West Point during my junior year in high school but because of some heart changing decisions I made just before and during my senior year I chose to go to Bible college instead I have served the Lord as a laymen in the church all of my adult life and worked in the secular world mostly in the construction industry as a contractor I have had a passion about the creation vs evolution subject since my teens and have read and studied everything I ve gotten in my possession whether pro creation or pro evolution I have listened diligently when the subject was being taught and have watched numerous evolution programs on educational and documentary television programs Everything I read heard or saw on the subject caused me to do deeper studies When all is said and done and all hoaxes errors contradictions and impossibilities are eliminated what is still left standing and makes common sense is creation I hope this book will give some Christians the ammunition to withstand Atheistic confrontations and that it may also win some nonbelievers over to understand that there really is a Creator God      Fateful Ties Gordon H. Chang,2015-04-13 Americans look to China with fascination and fear unsure whether the rising Asian power is friend or foe but certain it will play a crucial role in America s future This is nothing new Gordon Chang says For centuries Americans have been convinced of China s importance to their own national destiny Fateful Ties draws on literature art biography popular culture and politics to trace America s long and varied preoccupation with China China has held a special place in the American imagination from colonial times when Jamestown settlers pursued a passage to the Pacific and Asia In the eighteenth and nineteenth centuries Americans plied a profitable trade in Chinese wares sought Chinese laborers to build the West and prized China s art and decor China was revered for its ancient culture but also drew Christian missionaries intent on saving souls in a heathen land Its vast markets beckoned expansionists even as its migrants were seen as a yellow peril that prompted the earliest immigration restrictions A staunch ally during World War II China was a dangerous adversary in the Cold War that followed In the post Mao era Americans again embraced China as a land of inexhaustible opportunity playing a central role in its economic rise Through portraits of entrepreneurs missionaries academics artists diplomats and activists Chang demonstrates how ideas about China have long been embedded in America s conception of itself and its own fate Fateful Ties provides valuable perspective on this complex international and intercultural relationship as America navigates an uncertain new era      *China Journal of Science and Arts* ,1929      Origins Larry Booyer,2020-07-07 Origins Speak to the Earth is an anthology of scientific evidence supporting a creation global flood young earth worldview It is written primarily

Mrazek,2015-12-01 The award winning author of Valhalla brings back archaeologist Lexy Vaughan and retired Air Force officer Steve Macaulay as they race to save a priceless discovery from disappearing forever One of the greatest archaeological finds of all time Peking Man the 780 000 year old remains of our earliest known human ancestor disappeared during World War II from a cargo ship bound for America Now the Chinese government is fighting to keep a new religion from taking hold a faith based on the belief that Peking Man is God And they dispatch ruthless operatives to find and destroy the world s most priceless fossil But the U S government has its own team on the hunt From the mountains of Bavaria to the jungles of Central America and across the vast Pacific Professor Barnaby Finchem his brilliant protégé Lexy Vaughan and pilot Steve Macaulay will brave the wrath of nature and of man to win a race against unbridled tyranny      **The End of Heresy** John Shacklefree,2011-06-06 George Orwells book Nineteen Eighty Four describes a fictional world in which the manipulation of human thought by the political system has become so pervasive that the people involved in the manipulation do not realize how indoctrinated they have become Orwell describes doublethink as

the power of holding two contradictory beliefs in one's mind simultaneously and accepting both of them To tell deliberate lies while genuinely believing in them Shacklefree's book *The End of Heresy* asks us to consider if doublethink is part of our thinking and whether we are complicit in the process of using reason to justify what we want to believe Is there such a thing as self-evident truths and if so what part can reason play in helping us to find it These are the questions raised in Shacklefree's book and the evidence presented covers a large part of human history from the time of the ancient Greek philosophers up to the present and explores the areas of faith science and reason Its pages document the abuse of reason throughout history not only by despots but also by scientists clerics and modern democratically elected leaders The book explains how doublethink and newspeak are very much a part of modern democracies and asks us all to consider if we are part of the problem rather than the solution The book is a call to the normal person to cast off the modern indoctrination branded as freedom and think critically about what our modern day prophets are telling us     **At the French Embassy in Sofia** Peter Sourian, 1992     *Echoes from Old China* K.
