Parents Who Think Too Much Anne Cassidy, 2010-10-06 With the baby boom generation

came the genre of parenting books that told parents how to teach their kids everything from toilet training to developing self esteem Generally the message has been go easy on your child but hard on yourself It is starting to become apparent especially in the best of families that giving your kids lots of choices validating their feelings at great peril to your own and providing enough individual attention for each child is creating a generation of kids over whom we have no control Cassidy argues that this comes from over thinking our role as parents We ve pondered every step so much that the juice the joy and worst of all our confidence is gone The reasons are clear We have fewer children later in life so we ve had more time to ponder We ve grown up just as research on infant and child development has come of age so there s no shortage of material to think about As a generation we ve prided ourselves on self improvement and we bring the same zeal to child improvement We re less likely to live close to our families and so are more likely to seek out expert solutions To counter this thinking Cassidy will suggest keeping the big picture in mind what kind of people do you really want your kids to be Honest kind cooperative empathetic It may mean losing sight of whether enough play dates are scheduled for the week and if you ve positively reinforced the latest creative endeavor but it will bring back your instincts about what is important to your family as a whole and to your kids to become decent people *The Parent App* Lynn Schofield Clark,2013 New technologies offer new ways for families to connect access ideas and entertainment and manage the risks faced by children and teens but they also bring more responsibilities choices and challenges Clark argues that families experience digital and mobile technologies in their children s lives especially during the preteen and teen years quite differently depending on whether they are middle class or less advantaged Based on over ten years of interviews hundres of parents and children The Parent App explores these differences and provides the kind of guidance backed by thorough research that parents today desperately need

Cribsheet Emily Oster, 2019-04-23 From the author of *Expecting Better* The Family Firm and The Unexpected an economist's guide to the early years of parenting Both refreshing and useful With so many parenting theories driving us all a bit batty this is the type of book that we need to help calm things down LA Times The book is jam-packed with information but it's also a delightful read because Oster is such a good writer NPR With *Expecting Better* award winning economist Emily Oster spotted a need in the pregnancy market for advice that gave women the information they needed to make the best decision for their own pregnancies By digging into the data Oster found that much of the conventional pregnancy wisdom was wrong In *Cribsheet* she now tackles an even greater challenge decision making in the early years of parenting As any new parent knows there is an abundance of often conflicting advice hurled at you from doctors family friends and strangers on the internet From the earliest days parents get the message that they must make certain choices around feeding sleep and schedule or all will be lost There's a rule or three for everything But the benefits of these choices can be overstated and the trade offs can be profound How do you make your own best decision Armed with the data Oster

finds that the conventional wisdom doesn't always hold up. She debunks myths around breastfeeding not a panacea, sleep training not so bad, potty training wait until they're ready or possibly bribe with MMs, language acquisition, early talkers aren't necessarily geniuses, and many other topics. She also shows parents how to think through freighted questions like if and how to go back to work, how to think about toddler discipline, and how to have a relationship and parent at the same time.

Economics is the science of decision making, and *Cribsheet* is a thinking parent's guide to the chaos and frequent misinformation of the early years. Emily Oster is a trained expert and mom of two who can empower us to make better, less fraught decisions and stay sane in the years before preschool.

Infants, Toddlers & Preschoolers Julie Soto, 1998. A bibliography of print, videocassette, and electronic resources to help parents and guardians care for children from infancy through preschool. Each item is annotated and rated.
