Portfolio And Its Use Developmentally Appropriate Assessment Of Young Children:

The Portfolio and Its Use Cathy Grace, Elizabeth F. Shores, 1994-06-01 **Developing Portfolios for Authentic Assessment, PreK-3** Bertie Kingore, 2007-12-14 Written for early childhood educators this guide provides rubrics samples reproducibles and easy to understand procedures for developing fun effective student assessment portfolios and integrating assessment and instruction *Young Children and Families in the Information Age* Kelly L. Heider, Mary Renck Jalongo, 2014-12-05 This edited book presents the most recent theory research and practice on information and technology literacy as it relates to the education of young children Because computers have made it so easy to disseminate information the amount of available information has grown at an exponential rate making it impossible for educators to prepare students for the future without teaching them how to be effective information managers and technology users Although much has been written about information literacy and technology literacy in secondary education there is very little published research about these literacies in early childhood education Recently the National Association for the Education of Young Children and the Fred Rogers Center for Early Learning and Children s Media at Saint Vincent College published a position statement on using technology and interactive media as tools in early childhood programs This statement recommends more research to better understand how young children use and learn with technology and interactive media and also to better understand any short and long term effects Many assume that today s young children are digital natives with a great understanding of technology However children may know how to operate digital technology but be unaware of its dangers or its value to extend their abilities This book argues that information and technology literacy include more than just familiarity with the digital environment They include using technology safely and ethically to demonstrate creativity and innovation to communicate and collaborate to conduct research and use information and to think critically solve problems and make decisions **Focused Portfolios(tm)** Gaye Gronlund, Bev Engel, 2016-09-24 Offers an innovative method to accurately document children s growth and development by observing them in the midst of their everyday activities Used for years in programs across the country this easy to use system helps teachers assess children s progress in four areas Favorites Friends Family and Developmental Milestones Eight chapters include a complete introduction to the Focused Portfolios method many step by step examples and all the necessary forms for portfolio collection **Early Childhood Education** Petr G. Grotewell, Yanus R. Burton, 2008 This book focuses on early childhood education which spans the human life from birth to age 8 Infants and toddlers experience life more holistically than any other age group Social emotional cognitive language and physical lessons are not learned separately by very young children Adults who are most helpful to young children interact in ways that understand that the child is learning from the whole experience not just that part of the experience to which the adult gives attention Although early childhood education does not have to occur in the absence of the parent or primary caregiver this term is sometimes used to denote education by someone other than these the parent or primary caregiver Both

research in the field and early childhood educators view the parents as an integral part of the early childhood education process Early childhood education takes many forms depending on the theoretical and educational beliefs of the educator or parent Other terms that is often used interchangeably with early childhood education are early childhood learning early care and early education Much of the first two years of life are spent in the creation of a child's first sense of self or the building of a first identity Because this is a crucial part of children's makeup how they first see themselves how they think they should function how they expect others to function in relation to them early care must ensure that in addition to carefully selected and trained caregivers links with family home culture and home language are a central part of program policy If care becomes a substitute for rather than a support of family children may develop a less than positive sense of who they are and where they come from because of their child care experience The Psychoeducational Assessment of Preschool Children
