## Science Wars:

**After the Science Wars** Keith M. Ashman, Philip Shively Baringer, 2001 A collection of essays by leading philosophers and scientists focusing on the debate in science between those who believe that science is above criticism and those who do not

**Science Wars** Steven L. Goldman, 2021-11-16 In this book Steven L Goldman breaks down the barriers between these two groups to explain what scientists know how they know it why it is reliable and why the general public doesn't always know how to make sense of this Taking readers from Plato's perpetual battle to modern disagreements about vaccines Goldman's *Science Wars* provides a thought provoking analysis of the reliability of science

*Ending the Science Wars* John D. Baldwin, 2015-12-03 The science wars have been raging for decades raising many questions about the power of science Some critics claim that science including social science is merely a social construction that fallible humans have created with words and other symbols If this is true is science as formidable a source of knowledge as most scientists claim Baldwin explains why the edifice of science has robust properties that make it one of the most useful forms of knowledge that humans have ever created although it is not perfect He trenchantly examines all sides of the debate and uses the philosophy of pragmatism to reveal the special characteristics that make science work as well as it does *Ending the Science Wars* shows how science is far better grounded than its critics claim The book not only helps resolve many current debates about science it is a major contribution for explaining science in terms of a powerful philosophical system This makes the book valuable to scientists in all fields of research and intellectually challenging for science's critics

*Beyond the Science Wars* Ullica Christina Olofsdotter Segerstråle, Ullica Segerstråle, 2000-08-03 Contextualizes the Science Wars from interdisciplinary sociological historical scientific political and cultural perspectives

*Knowledge and the World: Challenges Beyond the Science Wars* Martin Carrier, Johannes Roggenhofer, Günter Küppers, Philippe Blanchard, 2013-03-09 The fundamental question of whether or in what sense science informs us about the real world has pervaded the history of thought since antiquity Is what science tells us about the world determined unambiguously by facts or does the content of any scientific theory in some way depend on the human condition Sokal's hoax attacked the mere seriousness of post modern views of science and shifted this controversial debate to a new level which very quickly came to be known as Science Wars *Knowledge and the World* examines and reviews the broad range of philosophical positions on this issue extending from realism to relativism to expound the epistemic merit of science and to tackle the central question in what sense can science justifiably claim to provide a truthful portrait of reality Challenges beyond the Science Wars are taken up by contributions of scientists sociologists and philosophers of science which connect perspectives of a wide variety of disciplines including biology and cultural studies This book addresses everyone interested in the philosophy and history of science and in particular in the interplay between the social and natural sciences

*Who Rules in Science?* James Robert Brown, 2001 Brown chronicles engagements in the science wars from the Sokal affair to angry confrontations over the nature of evidence the possibility of

objectivity and the methods of science to show how the contested terrain is science but the prize is political Whoever wins the science wars will have an unprecedented influence on our governance      *Making Social Science Matter* Bent Flyvbjerg, 2001-01-15 New approach demonstrating how social science can be successful focusing on context values and power      *Science Wars* Keith Parsons, 2003-02 Is science our most precious possession or has our culture elevated science into a false idol Is technology a useful servant or a malign genie These questions are at the centre of the science wars currently being waged over the role and future of science and technology in our society This balanced selection of a variety of perspectives on the hotly contested role of science and technology in contemporary society will clarify this vital debate for both specialists and non specialists      **Science Wars** Andrew Ross, 2012-06-01 In the wake of the highly fractious Culture Wars conservatives in science have launched a backlash against feminist multiculturalist and social critics in science studies Paul Gross and Norman Levitt's book *Higher Superstition* presented as a wake up call to scientists unaware of the dangers posed by the science bashers set the shrill tone of this reaction and led to the appearance of a growing number of scare stories about an antiscience movement in the op ed sections of newspapers across the country Unwilling to be political scapegoats for the decline in the public funding of science and the erosion of the public authority of scientists many of these critics natural scientists sociologists anthropologists historians and scholars in cultural studies and literary studies have taken the opportunity to respond to the backlash in *Science Wars* At a time when scientific knowledge is systematically whisked out of the domain of education and converted into private capital the essays in this volume are sharply critical of the conservative defense of a value free science They suggest that in a world steeped in nuclear biogenic and chemical overdevelopment those who are skeptical of technology are more than entitled to ask for evidence of rationality in those versions of scientific progress that respond only to the managerial needs of state corporate and military elites Whether uncovering the gender laden assumptions built into the Western scientific method redefining the scientific claim to objectivity showing the relationship between science's empirical worldview and that of mercantile capitalism or showing how the powerful language of science exercises its daily cultural authority in our society the essays in *Science Wars* announce their own powerful message Analyzing the antidemocratic tendencies within science and its institutions they insist on a more accountable relationship between scientists and the communities and environments affected by their research Revised and expanded from a recent issue of *Social Text* *Science Wars* will provoke thought and controversy among scholars and general readers interested in science studies and current cultural politics Contributors Stanley Aronowitz Sarah Franklin Steve Fuller Sandra Harding Roger Hart N Katherine Hayles Ruth Hubbard Joel Kovel Les Levidow George Levine Richard Levins Richard C Lewontin Michael Lynch Emily Martin Dorothy Nelkin Hilary Rose Andrew Ross Sharon Traweek Langdon Winner      **The Oxford Companion to the History of Modern Science** John L.
