Science Under Siege:

Science Under Siege Michael E. Mann, Peter J. Hotez, 2025-09-09 In this well researched guide two of the world's most respected scientists reveal the forces behind the dangerous anti science movement and offer powerful ideas about how to fight back Bill McKibben author of *Here Comes the Sun* Science is indeed under siege and that's not good for any of us Here Peter Hotez and Michael Mann name names It's not too late to do something it's time to get things done Read on Bill Nye science educator From pandemics to the climate crisis humanity faces tougher challenges than ever Whether it's the health of our people or the health of our planet we know we are on an unsustainable path But our efforts to effectively tackle these existential crises are now hampered by a common threat politically and ideologically motivated opposition to science Michael E. Mann and Peter J. Hotez are two of the most respected and well known scientists in the world and have spent the last twenty years on the front lines of the battle to convey accurate reliable and trustworthy information about science in the face of determined and nihilistic opposition In this powerful manifesto they reveal the five main forces threatening science plutocrats pros petrostates phonies and the press It is a call to arms and a road map for dismantling the forces of anti science Armed with the information in this book we can be empowered to promote scientific truths shine light on channels of dark money dismantle the corporations poisoning the planet and ultimately avert disaster

Science Under Siege Todd Wilkinson, 1998 Exposes how entrenched political interests beholden to industry lobbyists are waging an all out war to weaken key environmental laws and gut regulatory agencies and how deals are made giving private industry a profit at the public's expense Jacket

Science Under Siege Kendrick Frazier, *Science Under Siege* is a welcome antidote to the profound science illiteracy that today permeates American pop culture and the press NEIL deGRASSE TYSON Astrophysicist and author of *The Sky Is Not the Limit* and *The Pluto Files* An entertaining and eye opening collection of essays that advance the battle against ignorance and superstition STEVEN PINKER Harvard College Professor of Psychology Harvard University Author of *How the Mind Works* and *The Stuff of Thought* For more than thirty years *The Skeptical Inquirer* has steadfastly championed science and reason and been the leading voice for reliable scientific examination of the paranormal and other questionable claims popularized by the media and mass culture In this new collection of outstanding recent articles editor Kendrick Frazier has selected some of the best writing on topics of current interest Among the highlights are A Skeptical Look at September 11th which prompted a drove of responses many angry and was selected by Richard Dawkins for the Best Science and Nature Writing of 2003 Carl Sagan's final question and answer piece on the topic of science and skeptical inquiry Ann Druyan's beautifully expressed Science Religion Wonder and Awe NASA scientist Stuart Jordan's excellent appraisal of the scientific evidence for global warming which prompted much critical response and led to another follow up article Five articles on the evolution vs intelligent design controversy Two physicians articles that strongly defend the value of vaccinations and critique the anti vaccination movement Other distinguished contributors include Mario Bunge Martin

Gardner Ray Hyman Paul Kurtz Chris Mooney Joe Nickell Stephen Pinker and many others This excellent collection of stimulating articles exploring science and skeptical inquiry public controversies and investigating pseudoscientific claims is a must for scientists educators skeptics and everyone concerned about scientific literacy Kendrick Frazier Albuquerque NM is editor of the Skeptical Inquirer former editor of Science News and the editor of four previous collections including Encounters with the Paranormal and Science Confronts the Paranormal He is a fellow of the American Association for the Advancement of Science

Science under siege Peter Banks, Daniel Lunney, Chris Dickman, 2012-11-01 On Saturday 29 November 2008 the Royal Zoological Society of NSW held a forum with the theme of Science under siege As the RZS is a zoological society zoology under threat became the secondary theme and the basis for selecting speakers This book records that forum with the papers developed for this book as the written word from the spoken presentations Papers that were presented as posters are included as are the edited plenary sessions which featured questions from the floor with answers and comments encouraged from anyone in the forum We were delighted that Mark Horstman from ABC Catalyst was willing to replace his peripatetic colleague Paul Willis who was nonetheless very happy to write the foreword There is a place for such skilled science communicators we need more of them and scientists at the lab bench or in the field or exploring computer models or those that have now taken a job in the policy world need to stay in touch with them Some might say that the title Science under siege seems a bit extreme but we invite you to examine the evidence as presented in this book What follows is an edited version of the introductory material that advertised the forum The title looks dramatic but if you ask yourself is anything killing the science in your area of interest you might be surprised that you come up with a point or two Then ask a wider set of questions such as are there any pressures that preclude people from doing good zoology do either political budgetary constraints impact on your field is science in the media a subject that influences the outcome of your work are there economic impediments to careers in zoology is the education mix in Australia right for this new century are the best researchers becoming full time administrators or the converse the poor researchers becoming the administrators can you place the Australian situation in an international context are there reduced opportunities for human interactions with the natural world is the virtual world killing reality and what are your predictions of the future To deal with such issues the Royal Zoological Society of NSW has structured the day to emphasize a range of themes beginning with identifying the issues including those that are persistent and those that are emerging and encompassing palpable hits to science Direct and indirect hits to science include such matters as the withdrawal of funding subversion of science death by 1000 cuts redirection of funding to fashion issues and using the name of science to justify things that are really not justifiable The name of science is being dragged down We need to confront the ever present problem of ignoring the scientifically accurate for the politically correct This raises such questions as to whether basic skills in biology are not being acquired because of public concern based on extreme animal rights propaganda Good science is not optional but what can be done if you are under

siege The answers include understanding the philosophy of science the legal perspective and asking what scientists are or should be doing Audience participation will be a central part of this forum The plenary sessions will address questions raised by the speakers and the posters and debate issues and consider options for future directions It is widely known that it is hard to pull a major paper together on this theme but so many scientists know of at least one matter that they would like to draw to public attention So short contributions are included Listen to the speakers present some overarching themes or compelling case studies contribute to the debate on the day then examine your stance on a variety of these subjects to see whether the day changes your view of this often cryptic aspect of zoology As editors we wish to acknowledge the skills of the referees all papers were refereed by two peers and the patience of the authors for what has been a long gap between the date of the forum and this publication By the end of 2008 the Royal Zoological Society of NSW along with everyone else was caught by the GFC Global Financial Crisis and we simply had to extend the length of the queue for publication We also reassessed our mode of publication The Council of the Society voted to publish this production as an ebook as well as a short print run for formal library deposit and other essential matters The ebook is open access to enhance the reach of the papers and the ideas At the same time the Royal Zoological Society of NSW signed a contract for a more international mode of access of the publications of the Society and papers are now available via Metapress <http://rzsnsw.metapress.com> Science remains under siege in our view and now we have been alerted to the range of issues it becomes easier to spot the small irritating closing of options that collectively amount to a denial of science and its relegation to an optional way of looking at the world During production of this book this matter became obvious on a number of fronts which led us to invite the paper by Rosie Cooney and colleagues to defend their science of kangaroo conservation and commercial harvesting from an attack on the science We also saw that this issue of science under siege needs more airing and the Royal Zoological Society of NSW is planning its forum for the end of 2012 to take up another strand of this theme by capitalizing on the lifelong insights of scientists under the rubric of grumpy scientists an ecological conscience of a nation This idea in fact derives directly from the suggestions in the plenary sessions by Nick Holmes and Charley Krebs We are also concerned for young scientists with science under siege manifesting often in a failure to create permanent careers for science graduates that advance science itself and zoology in particular from flourishing and identifying problems and finding solutions If we want to conserve the native fauna of Australia then Australian zoologists will have to be key team members We contend that to put science under siege and zoology under threat we not only further imperil our native wildlife but also the careers of the small band of specialists that can see the issues find the problems implement solutions and evaluate the outcomes In short science under siege is not a light matter and no one in this forum thought so Read on form an opinion and speak up and publish your thoughts your examples and your solutions Science Under Siege Michael Fumento, 1996 Fumento a conservative science journalist explodes the media hype surrounding such perceived threats as Alar Agent Orange dioxin and food irradiation in this

provocative hard hitting defense of modern technology He exposes political intrigues and agendas that have led to the media's one sided coverage of Love Canal fallout from video display terminals electromagnetic fields and other issues

Forensic Science Under Siege Kelly Pyrek, 2010-07-27 Forensic science laboratories reputations have increasingly come under fire Incidents of tainted evidence false reports allegations of negligence scientifically flawed testimony or worse yet perjury in court testimony have all served to cast a shadow over the forensic sciences Instances of each are just a few of the quality related charges made in the last few years Forensic Science Under Siege is the first book to integrate and explain these problematic trends in forensic science The issues are timely and are approached from an investigatory yet scholarly and research driven perspective Leading experts are consulted and interviewed including directors of highly visible forensic laboratories as well as medical examiners and coroners who are commandeering the discussions related to these issues Interviewees include Henry Lee Richard Saferstein Cyril Wecht and many others The ultimate consequences of all these pressures as well as the future of forensic science has yet to be determined This book examines these challenges while also exploring possible solutions such as the formation of a forensic science consortium to address specific legislative issues It is a must read for all forensic scientists Provides insight on the current state of forensic science demands and future direction as provided by leading experts in the field Consolidates the current state of standards and best practices of labs across disciplines Discusses a controversial topic that must be addressed for political support and financial funding of forensic science to improve

Science Under Siege? Leon E. Trachtman, Robert Perrucci, 2000 The combative metaphor of Oscience warsO has taken on a predominant position within the collective conscious from being featured on the programs of scientific meetings to being splashed across the pages of leading national magazines and newspapers Some in the scientific community perceive their profession to be under siege by members of the academic left radical environmentalists religious fundamentalists eco feminists and others This book based on in depth interviews with sixty members of groups with alleged Oanti scienceO attitudes examines how pervasive and uniform these critiques are The research is designed to examine two conflicting hypotheses 1 that anti science attitudes reflect a general cynicism about all major social institutions and 2 that anti science views are not broadly based but are reflective instead of the particular interests of a given social grouping In the final analysis Perrucci and Trachtman dig at the root of the so called Oscience warsO by presenting evidence that the wars are not the product of an overarching suspicion of the institutions at the core of our society but are instead the product of organized interest groups which shape the attitudes and beliefs of their respective members

Science Under Siege Michael Fumento, 1993 *The Republican War on Science* Chris Mooney, 2007-03-16 Science has never been more crucial to deciding the political issues facing the country Yet science and scientists have less influence with the federal government than at any time since the Eisenhower administration In the White House and Congress today findings are reported in a politicized manner spun or distorted to fit the speaker's agenda or when they're too inconvenient ignored entirely On a broad

array of issues stem cell research climate change missile defense abstinence education product safety environmental regulation and many others the Bush administration s positions fly in the face of overwhelming scientific consensus Federal science agencies once fiercely independent under both Republican and Democratic presidents are increasingly staffed by political appointees and fringe theorists who know industry lobbyists and evangelical activists far better than they know the science This is not unique to the Bush administration but it is largely a Republican phenomenon born of a conservative dislike of environmental health and safety regulation and at the extremes of evolution and legalized abortion In The Republican War on Science Chris Mooney ties together the disparate strands of the attack on science into a compelling and frightening account of our government s increasing unwillingness to distinguish between legitimate research and ideologically driven pseudoscience

Social Problems in a Free Society Myles J. Kelleher, 2004-09-02 The future of the sociologist s profession is jeopardized by an ongoing trend toward the politicization of sociology and the radicalization of social problems This book calls for the rethinking of the culture of social political and economic liberty to create a resurgence of a sociological agenda Social Problems in a Free Society offers an original perspective on social problems such as violations of the principles of individual rights and the free market This book is a vision for reinvigorating the discipline in a fashion undreamt of within the wearisome strains of today s radical social problems theory
