Scienceplus 7 Technology And Society:

Science, Technology, and Society David D. Kumar, Daryl E. Chubin, 2012-12-06 David D Kumar and Daryl E Chubin We live in an information age Technology abounds information technology communication technology learning technology As a once popular song went Something's happening here but it's just not exactly clear The world appears to be a smaller less remote place We live in it but we are not necessarily closely tied to it We lack a satisfactory understanding of it So we are left with a paradox In an information age information alone will neither inform nor improve us as citizens nor our democracy society or institutions No improvement will take some effort It is a heavy burden to be reflective indeed analytical and disciplined but only constructively constrained by different perspectives The science based technology that makes for the complexity controversy and uncertainty of life sows the seeds of understanding in Science Technology and Society STS as it is known encompasses a hybrid area of scholarship now nearly three decades old As D R Sarewitz a former geologist now congressional staffer and an author put it After all the important and often controversial policy dilemmas posed by issues such as nuclear energy toxic waste disposal global climate change or biotechnology cannot be resolved by authoritative scientific knowledge instead they must involve a balancing of technical considerations with other criteria that are explicitly nonscientific ethics esthetics equity ideology Trade offs must be made in light of inevitable uncertainties Sarewitz 1996 p 182
