Our Common Journey National Research Council, Policy and Global Affairs, Policy Division, Board on Sustainable Development, 1999-11-09 World human population is expected to reach upwards of 9 billion by 2050 and then level off over the next half century How can the transition to a stabilizing population also be a transition to sustainability How can science and technology help to ensure that human needs are met while the planet's environment is nurtured and restored Our Common Journey examines these momentous questions to draw strategic connections between scientific research technological development and societies efforts to achieve environmentally sustainable improvements in human well being The book argues that societies should approach sustainable development not as a destination but as an ongoing adaptive learning process Speaking to the next two generations it proposes a strategy for using scientific and technical knowledge to better inform future action in the areas of fertility reduction urban systems agricultural production energy and materials use ecosystem restoration and biodiversity conservation and suggests an approach for building a new research agenda for sustainability science Our Common Journey documents large scale historical currents of social and environmental change and reviews methods for what if analysis of possible future development pathways and their implications for sustainability The book also identifies the greatest threats to

sustainability in areas such as human settlements agriculture industry and energy and explores the most promising opportunities for circumventing or mitigating these threats It goes on to discuss what indicators of change from children s birth weights to atmosphere chemistry will be most useful in monitoring a transition to sustainability *Watching, from the Edge of Extinction* Beverly Peterson Stearns, Stephen C. Stearns, 2000-01-01 Annotation In this mesmerizing series of interviews with dedicated people who work to save endangered species throughout the world an alarming truth emerges the obstacles of human politics greed corruption folly and hypocrisy can present as much danger to a species survival as biological causes The dramatic lessons of this book shed new light on the problems of declining species and offer hope that we may yet change their fate *Feather Trails* Sophie A. H. Osborn, 2024-05-02 Named ABA Birding Book Club s Best Book of the Year This book deserves to be read widely because it is only in coming to understand these animals suggests Osborn that we can choose to love and help them New Scientist The story of one woman s remarkable work with a trio of charismatic endangered bird species and her discoveries about the devastating threats that imperil them In *Feather Trails* wildlife biologist and birder Sophie A H Osborn reveals how the harmful environmental choices we ve made including pesticide use the introduction of invasive species lead poisoning and habitat destruction have decimated Peregrine Falcons Hawaiian Crows and California Condors In the Rocky Mountains the cloud forests of Hawai i and the Grand Canyon Sophie and her colleagues work day to day to try to reintroduce these birds to the wild even when it seems that the odds are steeply stacked against their survival With humor and suspense *Feather Trails* introduces us to the fascinating behaviors and unique personalities of Sophie s avian charges and shows that what endangers them ultimately threatens all life on our planet More than a deeply researched environmental investigation *Feather Trails* is also a personal journey and human story in which Sophie overcomes her own obstacles among them heat exhaustion poachers rattlesnakes and chauvinism Ultimately *Feather Trails* is an inspiring poignant narrative about endangered birds and how our choices can help to ensure a future not only for the rarest species but for us too An intimate look at the wonder and effort needed for working with endangered species in the wild Osborn s matter of fact writing style and wry humor make the reader part of the action Booklist starred review

Conservation Biology of Hawaiian Forest Birds Thane K. Pratt, Carter T. Atkinson, Paul C. Banko, Bethany L. Woodworth, James D. Jacobi, 2009-01-01 Hawaii s forest bird community is the most insular and most endangered in the world and serves as a case study for threatened species globally Ten have disappeared in the past thirty years nine are critically endangered and even common species are currently in decline Thane K Pratt his coeditors and collaborators all leaders in their field describe the research and conservation efforts over the past thirty years to save Hawaii s forest birds They also offer the most comprehensive look at the reasons for these extinctions and attempts to overcome them in the future Among the topics covered in this book are trends in bird populations environmental and genetic factors limiting population size avian diseases predators and competing alien bird species Color plates by award winning local photographer Jack Jeffrey illustrate

all living species discussed or described **Resurrection Science** M. R. O'Connor, 2015-09-15 A Library Journal Best Book of 2015 A Christian Science Monitor Top Ten Book of September In a world dominated by people and rapid climate change species large and small are increasingly vulnerable to extinction In Resurrection Science journalist M R O Connor explores the extreme measures scientists are taking to try and save them from captive breeding and genetic management to de extinction Paradoxically the more we intervene to save species the less wild they often become In stories of sixteenth century galleon excavations panther tracking in Florida swamps ancient African rainforests Neanderthal tool making and cryogenic DNA banks O Connor investigates the philosophical questions of an age in which we play god with earth s biodiversity Each chapter in this beautifully written book focuses on a unique species from the charismatic northern white rhinoceros to the infamous passenger pigeon and the people entwined in the animals fates Incorporating natural history and evolutionary biology with conversations with eminent ethicists O Connor s narrative goes to the heart of the human enterprise What should we preserve of wilderness as we hurtle toward a future in which technology is present in nearly every aspect of our lives How can we co exist with species when our existence and their survival appear to be pitted against one another

Bibliography of Agriculture with Subject Index , 1993-03 *In the Company of Crows and Ravens* John M. Marzluff, Tony Angell, 2008-10-01 Crows and people share similar traits and social strategies To a surprising extent to know the crow is to know ourselves from the Preface From the cave walls at Lascaux to the last painting by Van Gogh from the works of Shakespeare to those of Mark Twain there is clear evidence that crows and ravens influence human culture Yet this influence is not unidirectional say the authors of this fascinating book people profoundly influence crow culture ecology and evolution as well John Marzluff and Tony Angell examine the often surprising ways that crows and humans interact The authors contend that those interactions reflect a process of cultural coevolution They offer a challenging new view of the human crow dynamic a view that may change our thinking not only about crows but also about ourselves Featuring more than 100 original drawings the book takes a close look at the influences people have had on the lives of crows throughout history and at the significant ways crows have altered human lives In the Company of Crows and Ravens illuminates the entwined histories of crows and people and concludes with an intriguing discussion of the crow human relationship and how our attitudes toward crows may affect our cultural trajectory
