Medicine Michael Wayne, 2005-03 Is there an innate healing system within the body capable of facilitating the healing process And if so what is the mechanism that triggers this potential Many scientists philosophers healers and spiritually minded people have asked these very same questions and Dr Michael Wayne has begun to address the answers Although billions of dollars fuel the modern healthcare system people are not getting healthier the contrary seems to be the case Modern medicine does not have a good track record with chronic ailments because these are more complicated diverse and unpredictable and do not fit in with modern medicine's more linear approach that requires patterns that follow set rules For this reason our current form of medicine has problems with many illnesses even those as commonplace as the common cold

LeGault,2006-08-01 This isn t the time to Blink It s time to THINK before it s too late Outraged by the downward spiral of American intellect and culture Michael R LeGault offers the flip side of Malcolm Gladwell s bestselling phenomenon Blink which theorized that our best decision making is done on impulse without factual knowledge or critical analysis If bestselling books are advising us to not think LeGault argues it comes as no surprise that sharp incisive reasoning has become a lost art in the daily life of Americans Somewhere along the

line the Age of Reason morphed into the Age of Emotion this systemic erosion is costing time money jobs and lives in the twenty first century leading to less fulfillment and growing dysfunction LeGault provides a bold controversial and objective analysis of the causes and solutions for the erosion of growth and market share at many established American companies big and small which appear to have less chance of achieving the dynamic expansion of the past permissive parenting and low standards that have caused an academic crisis among our children body weights rise while grades plummet America's growing political polarization which is a result of our reluctance to think outside our comfort zone faulty planning and failure to act on information at all levels that has led to preventable disasters such as the Hurricane Katrina meltdown a culture of image and instant gratification fed by reality shows and computer games that has rendered curiosity of the mind and spirit all but obsolete stress aversion to taking risks and therapy that are replacing the traditional American can do mind set Far from perpetuating the stereotype of the complacent American LeGault's no holds barred analysis asks more of us than any other societal overview America can fulfill its greatest potential starting today and we need smart teachers smart health care workers smart sales representatives smart students smart mechanics and smart leaders to make it happen Now is the time to THINK because a mind truly is a terrible thing to waste
