and those academic administrators involved in the evaluation of social work scholars as well as academic librarians that support social work programs The Humanities, the Social Sciences and the University Harry Redner, 2023-05-31 The Humanities the Social Sciences and the University is an intellectual history of research in the humanities and social sciences It scrutinizes the priorities values objectives and publishing agendas of the modern university in order to assess the institutional pressures on research in major disciplines such as literature history sociology and economics It argues that all these disciplines are currently experiencing a deep malaise though to different degrees due to loss of faith in the Enlightenment project which entailed the pursuit of knowledge through reason Extreme scepticism promoted since the 1970s by French Theory which regards knowledge as an instrument of power is a major factor in this disorientation Overall the book concludes that though universities have grown stronger wealthier and more powerful in the last century the quality and seriousness of the research they typically produce are weaker and intellectually less important and the institution is in danger of losing its way An accessible and compelling read this book will appeal to scholars of sociology education and intellectual history with interests in higher education policy and academic life
