Hans Eysenck Philip J Corr, 2015-12-01 One of the most popular and controversial scientists of the 20th century Hans Eysenck had a major impact on psychology and society Who was this charismatic and sometimes divisive figure and why is he so relevant to science in the 21st century Hans Eysenck 1916 1997 was a key figure in psychology and his legacy still provokes varied and passionate responses With interests that ranged from personality and intelligence to sex and violence in the media Eysenck was unafraid to tackle contentious subjects of social and political importance In the centenary of Eysenck's birth Philip Corr explores the life and research of this contradictory and intriguing psychologist With access to some of the people that were closest to Eysenck during his lifetime Corr considers the scientific and historical contexts and assesses the continuing relevance of Eysenck's work

Biosocial Theories of Crime Kevin M. Beaver, 2017-07-05 Biosocial criminology is an emerging perspective that highlights the interdependence between genetic and environmental factors in the etiology of antisocial behaviors However given that biosocial criminology has only recently gained traction among

criminologists there has not been any attempt to compile some of the classic articles on this topic Beaver and Walsh's edited volume addresses this gap in the literature by identifying some of the most influential biosocial criminological articles and including them in a single resource. The articles covered in this volume examine the connection between genetics and crime, evolutionary psychology and crime, and neuroscience and crime. This volume will be a valuable resource for anyone interested in understanding the causes of crime from a biosocial criminological perspective.

The Reinforcement Sensitivity Theory of Personality Philip J. Corr, 2008-04-10 One of the major neuropsychological models of personality developed by world renowned psychologist Professor Jeffrey Gray is based upon individual differences in reactions to punishing and rewarding stimuli. This biological theory of personality now widely known as Reinforcement Sensitivity Theory (RST) has had a major influence on motivation, emotion, and psychopathology research. In 2000, RST was substantially revised by Jeffrey Gray together with Neil McNaughton, and this revised theory proposed three principal motivation/emotion systems: the Fight/Flight/Freeze System (FFFS), the Behavioural Approach System (BAS), and the Behavioural Inhibition System (BIS). This is the first book to summarise the Reinforcement Sensitivity Theory of personality and bring together leading researchers in the field. It summarizes all of the pre-2000 RST research findings, explains and elaborates the implications of the 2000 theory for personality psychology, and lays out the future research agenda for RST.

Handbook of Intelligence Robert J. Sternberg, 2000-03-13 Not since the landmark publication of *Handbook of Human Intelligence* in 1982 has the field of intelligence been more alive than it is today. Spurred by the new developments in this rapidly expanding field, Dr. Sternberg has brought together a stellar list of contributors to provide a comprehensive, broad, and deeply thematic review of intelligence that will be accessible to both scholar and student. The field of intelligence is lively on many fronts, and this volume provides full coverage on topics such as behavior, genetic models, evolutionary models, cognitive models, emotional intelligence, practical intelligence, and group difference. *Handbook of Intelligence* is largely expanded, covering areas such as animal and artificial intelligence as well as human intelligence. It fully reflects important theoretical progress made since the early 1980s.

An Introduction to Personality, Individual Differences and Intelligence Nick Haslam, Luke Smillie, John Song, 2017-02-25 The second edition of this popular textbook builds on the strengths of the first, continuing its reputation for clarity, accessibility, conceptual sophistication, and panoramic coverage of personality and intelligence. The authorship team is enriched by the addition of two high-profile international scholars, Luke Smillie and John Song, whose expertise broadens and deepens the text. New to this edition: Chapters exploring the neurobiological, genetic, and evolutionary foundations of personality and emotion; motivation and personality processes; an enhanced coverage of personality disorders; a thoroughly revised and extended section on intelligence which now addresses cognitive abilities and their biological bases; the role of intelligence in everyday life and emotional intelligence; a brand new companion website that includes a substantial test bank and lecture slides. *An Introduction to Personality, Individual Differences and Intelligence, Second Edition* is a key textbook for

all psychology students on a personality or individual differences course **Handbook on Risk and Need Assessment**
Faye Taxman, 2016-11-10 The Handbook on Risk and Need Assessment Theory and Practice covers risk assessments for individuals being considered for parole or probation Evidence based approaches to such decisions help take the emotion and politics out of community corrections As the United States begins to back away from ineffective expensive policies of mass incarceration this handbook will provide the resources needed to help ensure both public safety and the effective rehabilitation of offenders The ASC Division on Corrections Sentencing Handbook Series will publish volumes on topics ranging from violence risk assessment to specialty courts for drug users veterans or the mentally ill Each thematic volume focuses on a single topical issue that intersects with corrections and sentencing research
