People in the Middle Ages did not think the world was flat in fact medieval scholars could prove it wasn't The Inquisition never executed anyone because of their scientific ideas or discoveries actually the Church was the chief sponsor of scientific research and several popes were celebrated for their knowledge of the subject It was medieval scientific discoveries methods and principles that made possible western civilization's Scientific Revolution If you were taught that the Middle Ages were a time of intellectual stagnation superstition and ignorance you were taught a myth that has been utterly refuted by modern scholarship As a physicist and historian of science James Hannam shows in his brilliant new book *The Genesis of Science* How the Christian Middle Ages Launched the Scientific Revolution without the scholarship of the barbaric Middle Ages modern science simply would not exist The Middle Ages were a time of one intellectual triumph after another As Dr Hannam writes The people of medieval Europe invented spectacles the mechanical clock the windmill and the blast furnace by themselves Lenses and cameras almost all kinds of machinery and the industrial revolution itself all owe their origins to the forgotten inventors of the Middle Ages In *The Genesis of Science* you will discover Why the scientific accomplishments of the Middle Ages far surpassed those of the classical world How medieval craftsmen and scientists not only made discoveries of their own but seized upon Eastern inventions printing gunpowder and the compass and improved them beyond the dreams of their originators How Galileo's notorious trial before the Inquisition was about politics not science Why the theology of the Catholic Church far from being an impediment led directly to the development of modern science Provocative engaging and a terrific read James Hannam's *Genesis of Science* will change the way you think about our past and our future

God's Philosophers James Hannam, 2009-08-07 This is a powerful and a thrilling narrative history revealing the roots of modern science in the medieval world The adjective medieval has become a synonym for brutality and uncivilized behavior Yet without the work of medieval scholars there could have been no Galileo no Newton and no Scientific Revolution In God's Philosophers James Hannam debunks many of the myths about the Middle Ages showing that medieval people did not think the earth is flat nor did Columbus prove that it is a sphere the Inquisition burnt nobody for their science nor was Copernicus afraid of persecution no Pope tried to ban human dissection or the number zero God's Philosophers is a celebration of the forgotten scientific achievements of the Middle Ages advances which were often made thanks to rather than in spite of the influence of Christianity and Islam Decisive progress was also made in technology spectacles and the mechanical clock for instance were both invented in thirteenth century Europe Charting an epic journey through six centuries of history God's Philosophers brings back to light the discoveries of neglected geniuses like John Buridan Nicole Oresme and Thomas Bradwardine as well as putting into context the contributions of more familiar figures like Roger Bacon William of Ockham and Saint Thomas Aquinas
