

Some Scientific Objections to Theism

If God were allowed as an explanation in science, then 'anything goes'.

- The explanation of 'God did it' could be used for any event whatsoever, however regular or irregular and however comprehensible or incomprehensible.

Reply: God is not some arbitrary and capricious old man who can do what he likes.

Scientific Theism:

Scientific Theism Francis Ellingwood Abbot, 1886 *Scientific Theism* Francis Ellingwood Abbot, 1885 Scientific Theism Versus Materialism Arvid Reuterdaahl, 1920 God Without the Supernatural Peter Forrest, 1996 Peter Forrest expounds a program of best explanation apologetics. He contends that since the existence of God would provide the best possible explanation of various facts, those facts support theism. Among the facts cited are the suitability of the universe for life, the regularity of the universe, the human capacity for intellectual progress, the experience of a moral order, and various forms of beauty. The beauty that interests Forrest as evidence for the existence of God includes sensuous beauty, the beauty of the natural order as revealed by the sciences, and the beauty of necessity discovered by mathematicians. In addressing the need for an adequate motive for creation, Forrest conjectures that God created the universe for embodied persons, not for their life on earth alone, but also for an afterlife. Forrest acknowledges the speculative nature of such an account. He suggests that philosophical speculation is also required to defend theism against the charge that it is too extravagant, a hypothesis to be warranted. Providing a speculative defense against the argument from evil, he explains how such speculations can be used to support best explanation arguments without the conclusions themselves being rendered purely speculative. **Organic scientific philosophy.** **Scientific theism** Francis Ellingwood Abbot, 1885 Scientific Theism Francis Ellingwood Abbot, 1888 **Scientific Theism** Francis Ellingwood Abbot, 1979 **Scientific Theism** Francis Ellingwood Abbot, 1985

Research in the Social Scientific Study of Religion, Volume 23, 2012-05-23. The social scientific study of religion is a crucial arena of human endeavor as questions about the existence and nature of God interact with the study of religion as a human phenomenon. The twenty-third volume of *Research in the Social Scientific Study of Religion* continues the tradition of promoting extended debate of current issues in the field. The special section on Theism and Non Theism in Psychological Science includes contributions from leading researchers in this area. This landmark collection of papers draws on a range of perspectives that both summarize the theism debate in psychology and help to move it forward in new directions. In addition, the volume includes papers on other key areas in the study of religion, such as spirituality and social capital. Organic Scientific Philosophy. Scientific Theism Francis Ellingwood Abbot, 2013-09. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book without typos from the publisher. Not indexed. Not illustrated. 1885 edition. Excerpt as opposed to their purely subjective import and value. Even Schwegler blind as he is to the enormous importance of the struggle between Nominalism and Realism to which in his *History of Philosophy* he devotes less than one page, says of Socrates that there begins with him the philosophy of objective thought. p. 38. Stirling's translation. The italics are his. Aristotle explicitly declares in the *Metaphysics* XII 4 that Socrates was engaged in forming systems in regard to the ethical or moral virtues and was the first to institute an investigation in regard to the universal definition of these. There are two improvements in science which one might justly ascribe to Socrates. I allude to his

employment of inductive arguments and his definition of the universal Socrates did not it is true constitute universals a thing involving a separate subsistence nor did he regard the definitions as such the other philosophers however invested them with a separate subsistence But Socrates did attribute universal objective authority to the virtues he defined he refuted the Sophistic construction of them as merely subjective he repudiated the Sophistic notion that nothing is good or bad by nature
