S. de Reuck, Julie Knight, 2009-09-16 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world

The Paradox of Scientific Authority Wiebe E. Bijker, Roland Bal, Ruud Hendriks, 2009 Assessing the influence of scientific advice in societies that increasingly question scientific authority and expertise Today scientific advice is asked for and given on questions ranging from stem cell research to genetically modified food And yet it often seems that the more urgently scientific advice is solicited the more vigorously scientific authority is questioned by policy makers stakeholders and citizens This book examines a paradox how scientific advice can be influential in society even when the status of science and scientists seems to be at a low ebb The authors do this by means of an ethnographic study of the creation of scientific authority at one of the key sites for the interaction of science policy and society the scientific advisory committee The Paradox of Scientific Authority offers a detailed analysis of the inner workings of the influential Health Council of the Netherlands the equivalent of the National Academy of Science in the United States examining its societal role as well as its internal functioning and using the findings to build a theory of scientific advising The question of scientific authority has political as well as scholarly relevance Democratic political institutions largely developed in the nineteenth century lack the institutional means to address the twenty first century s pervasively scientific and technological culture and science and technology studies STS grapples with the central question of how to understand the authority of science while recognizing its socially constructed nature
