William Adams, Martin Mulligan

Scotland The Nature Of The Land:

The Nature of the Cairngorms Philip Shaw, Des B.A. Thompson, 2006-06-12 The Cairngorms area is arguably the most significant for nature conservation in the British Isles and contains its largest National Park In this book 35 authors drawing on published and unpublished sources present an up to date review of the area's natural features including plants animals habitats geology and landforms The review falls into three parts The first and largest part describes the area's rich diversity of nature with each chapter summarising recent research findings trends and conservation issues for a different landform habitat or species group The second part considers deer management recreation and projected climate change impacts Part three focuses on rare and threatened species and identifies areas and habitats rich in species for which the Cairngorms are nationally and internationally important Scotland Colin Baxter, 1987 **The Law of Nature Conservation** Christopher Rodgers, 2013-03-21 This book provides a detailed account of the UK law of nature conservation It covers all the extensive laws introduced in recent years to protect and promote the natural world examining the operation of the legislation in practice *Nature and Space in Contemporary Scottish Writing and Art* Camille Manfredi, 2019-05-29 This book examines how contemporary Scottish writers and artists revisit and reclaim nature in the political and aesthetic context of devolved Scotland Camille Manfredi investigates the interaction of landscape aesthetics and strategies of spatial representation in Scotland's twenty first century literature and arts focusing on the apparatuses designed by nature writers poets performers walking artists and visual artists to physically and intellectually engage with the land and re present it to themselves and to the world Through a comprehensive analysis of a variety of site specific artistic practices artworks and publications this book investigates the works of Scotland based artists including Linda Cracknell Kathleen Jamie Thomas A Clark Gerry Loose John Burnside Alec Finlay Hamish Fulton Hanna Tuulikki and Roseanne Watt with a view to exploring the ongoing re invention of a territory bound identity that dwells on an inclusive sense of place as well as on a complex renegotiation with the time and space of Scotland *Environmental Protection Act 1990* Great Britain, 1990 Royal assent 1st November 1990 Reprinted with corrections 1998 and 2000 *The Nature of Scotland* Magnus Magnusson, Graham White, 1997 This is an illustrated study of the interdependence of the landscape the wildlife and the people of Scotland It begins with Scotland's violent birth and retells tales of the early hunters who followed the retreating ice and the first farmers who cleared the land and began farming The authors go on to discuss the implicit conflicts in the use of land today and the state of the environment and the other forces which have transformed the landscape and wildlife today Nature and Culture in the Northern Forest Pavel Cenkl, 2010-03-15 Nearly 30 million acres of the Northern Forest stretch across New York Vermont New Hampshire and Maine Within this broad area live roughly a million residents whose lives are intimately associated with the forest ecosystem and whose individual stories are closely linked to the region's cultural and environmental history The fourteen engaging essays in *Nature and Culture in the Northern Forest* effectively explore the relationships among place work and community

in this complex landscape Together they serve as a stimulating introduction to the interdisciplinary study of this unique region Each of the four sections views through a different lens the interconnections between place and people The essayists in Encounters have their hiking boots on as they focus on personal encounters with flora and fauna of the region The energizing accounts in Teaching and Learning question our assumptions about education and scholarship by proposing invigorating collaborations between teachers and students in ways determined by the land itself not by the abstractions of pedagogy With the freshness of Thoreau's irreverence the authors in Rethinking Place look at key figures in the forest's literary and cultural development to help us think about the affiliations between place and citizenship In Nature as Commodity three essayists consider the ways that writers from the nineteenth and early twentieth centuries thought about nature as a product and thus how their conclusions bear on the contemporary retailing of place The writers in Nature and Culture in the Northern Forest reveal the rich affinities between a specific place and the literature thought and other cultural expressions it has nurtured Their insightful and stimulating connections exemplify adventurous bioregional thinking that encompasses both natural and cultural realities while staying rooted in the particular landscape of some of the Northeast's wildest forests and oldest settlements

An Inquiry Into the Nature and Causes of the Wealth of Nations Adam Smith, John Ramsay McCulloch, 1859
Decolonizing Nature William Adams, Martin Mulligan, 2012-04-27
British imperialism was almost unparalleled in its historical and geographical reach leaving a legacy of entrenched social transformation in nations and cultures in every part of the globe Colonial annexation and government were based on an all encompassing system that integrated and controlled political economic social and ethnic relations and required a similar annexation and control of natural resources and nature itself Colonial ideologies were expressed not only in the progressive exploitation of nature but also in the emerging discourses of conservation At the start of the 21st century the conservation of nature is of undiminished importance in post colonial societies yet the legacy of colonial thinking endures What should conservation look like today and what indeed whose ideas should it be based upon Decolonizing Nature explores the influence of the colonial legacy on contemporary conservation and on ideas about the relationships between people politics and nature in countries and cultures that were once part of the British Empire It locates the historical development of the theory and practice of conservation at both the periphery and the centre firmly within the context of this legacy and considers its significance today It highlights the present and future challenges to conservationists of contemporary global neo colonialism The contributors to this volume include both academics and conservation practitioners They provide wide ranging and insightful perspectives on the need for and practical ways to achieve new forms of informed ethical engagement between people and nature
