Civil Society, Associations and Urban Places Boudien de Vries,2016-12-05 In recent years the concept of civil society has become central to the historian s understanding of class cultural and political power in the nineteenth century town and city Increasingly clubs and voluntary societies have been regarded as an important step in the formation of formal political parties particularly for the working and middle classes The result of this is the assertion that the more associations existing in a particular society the deeper democracy becomes entrenched In order to test this hypothesis this volume brings together essays by an international group of urban historians who examine the construction of civil society from associational activity in the urban place From their studies it soon becomes clear that such simple propositions do not adequately reflect the dynamics of nineteenth century urban society and politics Urban associations were ideological in purpose and deliberately discriminatory and as such set the boundaries of civil society Thus competing and segmented associations were not only an indication of pluralism and strength but also highlighted a fundamental weakness when faced down by the interests of the state Through a wide array of urban associations in a broad

range of settings comprising Austria and Bratislava France and Italy the Netherlands Austro Hungary England Scotland and the US this volume reflects on the construction of class nation and culture in the associations of the nineteenth century urban place In so doing it shows that a deep and interlocking civil society does not automatically lead to a rise in democratic activity Expansion of the networks of urban association could equally result in greater subdivision and to the fragmentation and isolation of certain groups Partition as much as coherence is our understanding of civil society and associations in the nineteenth century urban place **England, Ireland, Scotland, Wales** Keith Robbins,2008-09-04 This is a lovely and accessible examination of all branches of the Christian Church in England Ireland Scotland and Wales in the twentieth century in their central interaction with politics social issues war and culture It considers their pursuit of an elusive unity throughout a century when prevailing cultural attitudes underwent massive change People and Society in Scotland, 1830-1914 W. Hamish Fraser,R. J. Morris,2021-11-01 This is the second volume of a three volume study of Scottish social change and development from the eighteenth century to the present day originally published by John Donald in association with the Economic and Social History Society of Scotland The series covers the history of industrialisation and urbanisation in Scottish society and records many experiences which Scotland shared in common with other societies looking at the impact of those changes throughout the spectrum of society from croft bothy and hunting lodge to mines foundries and urban poor houses The series is intended to illustrate the identity and distinctiveness of Scotland through its separate institutions and through areas such as language law and religion and recognises Scotland as a multi cultured society the highland and lowland cultures being only two among several *Alcohol and Temperance in Modern History* Jack S. Talbot,2021-04-12 In the second half of the nineteenth century Scottish Baptists like other Evangelical Protestant denominations were focusing more on things they had in common such as a commitment to home evangelization and church planting providing a common fund to assist small and struggling congregations the provision of theological education for the

training of prospective pastors together with the need to disseminate information between the churches concerning their progress in the work of the gospel From the start of this Baptist Union in 1869 the numbers of churches and members grew steadily until 1935 It was a remarkable story of dedicated Christian service Scottish Baptists came through two world wars the social revolution of the 1960s and the materialistic emphases of the 1980s with a significant degree of success in adapting their evangelistic activities to relate to their social context There is little doubt that from the late 1980s the growing secularization in this country ensured that mission strategies adopted by these Scottish Christians were less successful than in previous decades However a revitalization of its work in the early years of the twenty first century has given renewed grounds for hope for its work and witness in the coming years

People and Power in Scotland Roger A. Mason, Norman Macdougall, 2001-01-01 Few Scottish historians are better known than T C Smout and fewer still more deserving of the high esteem in which they are held He has made an outstanding contribution to Scottish historical studies both as an academic discipline and as a subject of wide popular appeal His retirement in 1991 after twelve years as Professor of Scottish History at the University of St Andrews diminished neither his interest nor his output It did however provide a fitting opportunity to honour his accomplishments This collection of ten essays by his friends and colleagues at St Andrews is a measure of his enormous success in promoting Scottish history there and of their respect for his achievements Ranging widely over the Scottish past from the fifteenth to the nineteenth centuries from high politics to popular protest from shipwrecks to railway mania from local social studies to the problem of national identity the essays pay tribute to the depth of Smout's historical understanding by reflecting the breadth of research that he has done so much to encourage
