Wildlife Forensic Investigation John E. Cooper, Margaret E. Cooper, 2013-04-25 Wildlife forensics is the application of forensic science to the conservation and protection of non domesticated animals both in the wild and in captivity Providing an in depth introduction to this rapidly evolving field Wildlife Forensic Investigation Principles and Practice also chronicles aspects of the history of management conservation and environmental protection with an emphasis on their global importance in the twenty first century The book examines the crucial role of wildlife forensic investigation with regard to live animals dead animals and samples and covers national regional and international legislation While the text particularly focuses on forensic science as it relates to wild animals it also includes mention of plants and habitats because of their relevance to conservation The book discusses animal welfare as well as the damage that can be inflicted on humans and property by wildlife Offering access to sound evidence based on good science and obtained using the best available practices the book is enhanced by case studies from experts who describe some of their own work This resource is essential for those involved in a range of endeavours including investigating wildlife crime

identifying animal remains ascertaining the circumstances of death of wild species and other legal proceedings and activities concerning wildlife The forensic skills described in this book can be applied to a wide range of activities not necessarily involving the legal process including environmental impact assessments insurance claims governmental and other enquiries checking of trading standards and the inspection of for instance pet shops animal boarding establishments and zoological collections The authors point out that one of the most important requirements of those persons involved in wildlife forensic work is to retain an open mind Such personnel should also be conscious of new developments and evolving techniques and be able to anticipate situations where their investigative and scientific skills might be used to advantage so called horizon scanning Examples of these are given

Fauna Scotica Polly Pullar, Mary Low, 2012 Scotland boasts a huge and diverse range of wildlife This informative and beautifully illustrated book is the most complete companion to Scottish animals available Themed around various habitats mountain bog and moor woods lochs and rivers croft and farm sea and seashore urban and including material on mythical beasts

An Introduction to Animal Law Cooper, 2012-12-02 Legislation relating to animals has ancient origins and in many civilizations certain species have held particular significance be it religious cultural nutritional or sporting As a general rule the law was primarily concerned with animals as property rather than in need of protection until the 19th century Since the 1970s animal law has proved to be a growth area in the production and enforcement of both national and international legislation This has been particularly so in the areas of conservation and welfare and there has been extensive legal and philosophical consideration of the status of animals This book is not intended to be a standard text but rather a handbook in the true sense a guide for the lay person namely to help the non lawyer to understand the basic concepts of animal law and to provide the lawyer who is the lay person in the world of animal science with an introduction to relevant concepts and literature which are not normally found in the conventional legal texts

Screening the Nonhuman Amber E. George, J.L. Schatz, 2016-04-27 Screening the Nonhuman draws connections between how animals represented on screen translate into reality In doing so the book demonstrates that consuming media is not a neutral act but rather a political one The images humans consume have real world consequences for how animals are treated as actors as pets and in nature The contributors propose that altering the representations of animals can change the way humans relate to non humans Our hope is for humans to generate more ethical relationships with non humans ultimately mediating reality both in terms of fiction and non fiction To achieve this end film television advertisements and social media are analyzed through an intersectional lens But the book doesn't stop here Each author creates counter representational strategies that promise to unweave the assumptions that have led to the mistreatment of humans and non humans alike
