identifying animal remains ascertaining the circumstances of death of wild species and other legal proceedings and activities concerning wildlife The forensic skills described in this book can be applied to a wide range of activities not necessarily involving the legal process including environmental impact assessments insurance claims governmental and other enquiries checking of trading standards and the inspection of for instance pet shops animal boarding establishments and zoological collections The authors point out that one of the most important requirements of those persons involved in wildlife forensic work is to retain an open mind Such personnel should also be conscious of new developments and evolving techniques and be able to anticipate situations where their investigative and scientific skills might be used to advantage so called horizon scanning Examples of these are given Fauna Scotica Polly Pullar, Mary Low, 2012 Scotland boasts a huge and diverse range of wildlife This informative and beautifully illustrated book is the most complete companion to Scottish animals available Themed around various habitats mountain bog and moor woods lochs and rivers croft and farm sea and seashore urban and including material on mythical beasts **An Introduction to Animal Law** Cooper, 2012-12-02 Legislation relating to animals has ancient origins and in many civilizations certain species have held particular significance be it religious cultural nutritional or sporting As a general rule the law was primarily concerned with animals as property rather than in need of protection until the 19th century Since the 1970s animal law has proved to be a growth area in the production and enforcement of both national and international legislation This has been particularly so in the areas of conservation and welfare and there has been extensive legal and philosophical consideration of the status of animals This book is not intended to be a standard text but rather a handbook in the true sense a guide for the lay person namely to help the non lawyer to understand the basic concepts of animal law and to provide the lawyer who is the lay person in the world of animal science with an introduction to relevant concepts and literature which are not normally found in the conventional legal texts **Screening the Nonhuman** Amber E. George, J.L. Schatz, 2016-04-27 Screening the Nonhuman draws connections between how animals represented on screen translate into reality In doing so the book demonstrates that consuming media is not a neutral act but rather a political one The images humans consume have real world consequences for how animals are treated as actors as pets and in nature The contributors propose that altering the representations of animals can change the way humans relate to non humans Our hope is for humans to generate more ethical relationships with non humans ultimately mediating reality both in terms of fiction and non fiction To achieve this end film television advertisements and social media are analyzed through an intersectional lens But the book doesn't stop here Each author creates counter representational strategies that promise to unweave the assumptions that have led to the mistreatment of humans and non humans alike The Eildon Hills Malcolm Lindsay (Secretary of the Scottish Wildlife Trust Central Borders Group), 2016 **Dictionary of Zoo Biology and Animal Management** Paul A. Rees, 2013-09-23 This dictionary is intended as a guide to the terminology used in a wide range of animal related programmes of study including agriculture animal care
