Smallpox: The Death of a Disease D. A. Henderson, M.D., 2009-09-25 For more than 3000 years hundreds of millions of people have died or been left permanently scarred or blind by the relentless incurable disease called smallpox In 1967 Dr D A Henderson became director of a worldwide campaign to eliminate this disease from the face of the earth This spellbinding book is Dr Henderson s personal story of how he led the World Health Organization s campaign to eradicate smallpox the only disease in history to have been deliberately eliminated Some have called this feat the greatest scientific and humanitarian achievement of the past century In a lively engrossing narrative Dr Henderson makes it clear that the gargantuan international effort involved more than straightforward mass vaccination He and his staff had to cope with civil wars floods impassable roads and refugees as well as formidable bureaucratic and cultural obstacles shortages of local health personnel and meager budgets Countries across the world joined in the effort the United States and the Soviet Union worked together through the darkest cold war days and professionals from more than 70 nations served as WHO field staff On October 26 1976 the last case of smallpox occurred The disease that annually had killed two million people or more had been vanquished and in just over ten years The story did not end there Dr Henderson recounts in vivid detail the continuing struggle over whether to destroy the remaining virus in the two laboratories still that held it Then came the startling discovery that the Soviet Union had been experimenting with smallpox virus as a biological weapon and producing it in large quantities The threat of its possible use by a rogue nation or a terrorist has had to be taken seriously and Dr Henderson has been a central figure in plans for coping with it New methods for mass smallpox vaccination were so successful that he sought to expand the program of smallpox immunization to include polio measles whooping cough diphtheria and tetanus vaccines That program now reaches more than four out of five children in the world and is eradicating poliomyelitis This unique book is to be treasured a personal and true story that proves that through cooperation and perseverance the most daunting of obstacles can be overcome

Smallpox, Syphilis and Salvation Sheryl Persson, 2010-04 Since ancient times the search for cures for the great scourges that have afflicted humankind has been an ongoing quest but it is only within the last 200 years that major breakthroughs have occurred and the development of modern medicine has accelerated The stories behind these miraculous cures are those of intense rivalries and jealousies bitter public humiliation unswerving dedication subterfuge and great personal struggles Often these medical advances have truly changed the world When Edward Jenner developed the concept of vaccination and with it the cure for smallpox he found a way to defeat a disease that had affected half a billion people more than all those affected by wars and other epidemics combined And while the Black Death still lingers in pockets around the world it no longer threatens to

destroy entire civilisations as it once did SMALLPOX SYPHILIS AND SALVATION uncovers the compelling stories of the men and women innovations and accidents that have led to diseases from polio to syphilis diphtheria to diabetes tetanus to leukaemia no longer being the death sentences they once were It also sounds a note of warning for some of these diseases are fighting back It is estimated that tuberculosis now claims one life every fifteen seconds while new superbugs are resistant to penicillin and other antibiotics Diseases may once again threaten to crush the world's population either in the form of biological warfare or simply because they want to survive as much as we do
