Video and DVD Industries Paul McDonald, 2019-07-25. When the videocassette recorder was launched on the consumer market in the mid 1970s, it transformed home entertainment. Bringing together complementary but also competing interests from the consumer electronics industry and the film, television and other copyright industries, video created a new sector of media business. Two decades later, DVD reinvented video media for the digital age. DVD provided consumers with an innovative form of entertainment technology and almost instantaneously became the catalyst for a huge boom in the video market. Although the VCR and DVD created major markets for video hardware and software, the video business has been continually shaped by industry conflicts and tensions. Repeatedly, the video market has become divided when faced with the introduction of competing formats. Easy reproduction of films and other works on cassette or disc made video software a lucrative market for the copyright industries but also intensified struggles to combat the effects of commercial piracy.

Video and DVD Industries examines the business of video entertainment and provides the first study looking at DVD from an industrial perspective. Detailing divisions in the video business, the book outlines industry battles over incompatible formats from the Betamax/VHS war to competing laserdisc systems, alternatives such as video compact disc or Digital Video Express, and the introduction of HDDVD and Blu-ray high definition systems. Chapters also look at the formation of international markets in the globalization of video media, the contradictory responses of the Hollywood studios to video and DVD, and the legal and technological measures taken to control industrialized video piracy.

Strategic Modelling and Business Dynamics John Morecroft, 2007-09-10. John Morecroft's book is an ideal text for students interested in system modelling and its application to a range of real world problems. The numerous examples provide a rich test bed for the development of systems thinking and modelling skills.

John Sterman, Jay W. Forrester, Professor of Management, MIT Sloan School of Management. This book, with its vivid examples and simulators, will help to bring modelling, system dynamics and simulation into the mainstream of management education where they now belong.

John A. Quelch, Professor of Marketing, Harvard Business School. Former Dean of London Business School. This text fills the gap

between texts focusing on the purely descriptive systems approach and the more technical system dynamics ones Ann van Ackere Professor of Decision Sciences HEC Lausanne Universit de Lausanne Strategic modelling based on system dynamics is a powerful tool for understanding how firms adapt to a changing environment The author demonstrates the appeal and power of business modelling to make sense of strategic initiatives and to anticipate their impacts through simulation The book offers various simulators that allow readers to conduct their own policy experiments Dr Erich Zahn Professor of Strategic Management Betriebswirtschaftliches Institut University of Stuttgart A website to accompany the book can be found at www.wiley.com/college/morecroft housing supplementary material for both students and lecturers Books in Print ,1994
