Screen Design Manual Frank Thissen, 2003-09-11 The Screen Design Manual provides designers of interactive media with a practical working guide for preparing and presenting information that is suitable for both their target groups and the media they are using. It highlights background information and relationships, clarifying them with examples and encourages the further development of the language of digital media. In addition to the basics of perception and learning psychology, ergonomics, communication theory, imagery research, and aesthetics, the book also considers design navigation and orientation elements. Guidelines and checklists along with the comprehensive design of the book support the transfer of information into practice. Frank Thissen teaches multimedia didactics and information design at the University of Applied Sciences in Stuttgart. For over 10 years he has been developing computer-based training. He has worked for international companies such as Siemens AG and SAP AG. His research project explores the role of emotion in e-learning. www.frankthissen.de Key Topics: Interactive media, Text for the screen, Effective use of pictures, Video animation and sound, Screen layout, Orientation and navigation, Interaction, Emotions and metamessages, Intercultural communication. Theory and concepts are followed by practical application, and a blend of text and graphics appeals to a wide range of learning styles. Accompanying online material includes design templates which the reader can use to record ideas as they progress through the book so that by the end they will have a complete course design. Online supporting resources include dozens of activities, examples, and templates. From beginners to professional graphic designers, desktop publishers, and graphic design students, The Design Manual provides essential information on conceptual approaches, planning, and project development techniques for print, web, and multimedia production. Design tasks are divided into sections on publication, corporate identity on screen, and advertising design. There is discussion of specific skills such as branding and logo design, stationery, catalogue, annual report, and newsletter production, websites, storyboarding, and animation techniques, and more. The production section discusses layout and typography for print and screen, colour and colour systems, printing, and finishing processes. With numerous checklists and practical tips throughout the text, The Design Manual has become a standard reference for anyone involved in or interested in design.
