**Achaemenid Impact in the Black Sea** Jens Nieling, Ellen Rehm, 2010-07-16 For 200 years from the second half of the sixth century to the decades before 330 BC the Persian dynasty of the Achaemenids ruled an enormous empire stretching from the Mediterranean Sea to Afghanistan and India The Great Kings Dareios I and Xerxes I even tried to conquer Greece and the northern Black Sea

territories Although they failed parts of Thrace did become part of their dominion for a short period The question always rises as to why the Great Kings were interested in the western and northern Pontic zones In contrast to some of the other satrapies such as Egypt Phoenicia and Syria the Black Sea had no prosperous cities or provinces to offer One possible answer might be the desire to conquer every part of the known world After 479 BC it seems that the Great Kings acknowledged the fact that the coast and the Caucasus formed the natural borders of their Empire The satraps on the other hand could not avoid becoming involved in the affairs of the Black Sea region in order to safeguard the frontiers they had established They had to incorporate the Greeks as accepted inhabitants of their province into the Persian administrative system Possibly they achieved this by granting them the monopoly in sea trade and using the Anatolian Greeks as the main active bearers and transmitters of Persian customs and culture More research into this chapter of Persian history is still required Fantastic Fauna from China to Crimea Petya Andreeva, 2024-03-05 Numerous Iron Age nomadic alliances flourished along the 5000 mile Eurasian steppe route From Crimea to the Mongolian grassland nomadic image making was rooted in metonymically conveyed zoomorphic designs creating an alternative ecological reality The nomadic elite nucleus embraced this elaborate image system to construct collective memory in reluctant diverse political alliances organised around shared geopolitical goals rather than ethnic ties Largely known by the term e animal stylee this zoomorphic visual rhetoric became so ubiquitous across the Eurasian steppe network that it transcended border regions and reached the heartland of sedentary empires like China and Persia This book shows how a shared fluency in animal style design became a status defining symbol and a bonding agent in opportunistic nomadic alliances and was later adopted by their sedentary neighbours to showcase worldliness and control over the e Other In this study of enormous geographical scope the author raises broader questions about the place of nomadic societies in the art historical canon *Meetings of Cultures in the Black Sea Region* Jane Hjarl Petersen Pia Guldager Bilde, 2008-06-16 As a theme Meetings of Cultures in the Black Sea Region Between Conflict and Coexistence arouses strong feelings From the remotest Antiquity the indigenous and nomadic non Greek populations of the Pontic region were persistently viewed as one of the major Others first of all by Mediterranean Greeks And because the region geographically was located as a bridge between Europe and Asia it was and still is also part of a Europe Asia discourse of dichotomy As far back in time as Antiquity Western self understanding and identity formation has been shaped not least through its colonial experiences Until recently such colonial experience has led to a very static picture in our analysis of colonial encounters However as a result of post colonialism post modernism and now globalization our conception of colonization has undergone a rapid and far reaching conceptual change Gone are the days when the Black Sea region was seen as a sea of barbarian wilds enlightened by small flicks of Greek civilization along the coast Settling the Black Sea region was a challenge for the Greeks Compared with the Mediterranean this happened relatively late and the attempt of settling the land was not always equally successful In fact frequently the power balance was in favour of the indigenous population

Nevertheless the cultivation of the land and the establishment of exchange systems must have been beneficial for all participants in the exchange network In this volume the acts of an international interdisciplinary conference held at Sandbjerg Manor House Denmark in January 2006 are published 19 contributions by scholars from Denmark France Georgia Great Britain the Netherlands Russia and Ukraine give a profound discussion of various topics such as the physical arena of the colonial encounters as spaces of identity the layout of land and protection of cities the dynamics of the cultural exchange the perception of how it was to be Greek in the Pontic realm and finally the reciprocal strategies exerted by the Greeks and Scythians in Olbia as described in Herodotos Fourth Book of his Histories Through the many sided contributions it is also revealed how self and other is two sides of the same coin yesterday today and tomorrow North Pontic Archaeology G.R. Tsetskhladze, 2021-11-22 This volume deals with the classical archaeology of the northern Black Sea littoral discussing excavations and studies conducted by Russian Ukrainian German Czech and British archaeologists and classicists over the last 10 12 years It presents the results of excavations of such sites as Berezan Nikonion the chora of Olbia the chora of Chersonesus rural settlements of the European Bosphorus sites on the Taman Peninsula etc Several articles discuss the Scythians and other local peoples as well as particular objects This 6th volume of Colloquia Pontica publishes much previously unknown material and gives a clear picture of the achievements of scholarship in the study of the North Pontic Region Included are book reviews and an elaborate listing of new publications The book is very richly illustrated Ancient Scholars about the Turks and the Turkic Nations.
