Sea Brothers The Tradition Of American Sea Fiction From Moby Dick To The Present:

Sea-Brothers Bert Bender, 2015-11-16 Sea Brothers offers the most extensive analysis to date of the sea and its meaning in American literature. On the basis of his study of Melville, Crane, London, Hemingway, Matthiessen, and ten lesser known sea writers, Bert Bender argues that the tradition of American sea fiction did not end with the opening of the western frontier and the replacement of sailing ships by steamers. Rather, he demonstrates its continuity and vitality, identifying a central vision within the tradition and showing how particular authors draw from, transform, and contribute to it. What is most distinctive about American sea fiction, Bender contends, is its visionary, often mystical response to the biological world and to man's perceived place in the larger universe. When Melville envisioned the sea as the essential element of life, indeed as life itself, he changed the course of American sea fiction by introducing the relevance of biological thought. But his meditations on the whale and the ungraspable phantom of life project a different reality from that envisioned by his successors. In American sea fiction after Melville, the influence of *Origin of Species* is as powerful as that of *Moby Dick*, or the theme of sailing ships being displaced by steam. The ideal of brotherhood so central to American sea fiction was severely compromised by the biological reality of a competitive, warring nature. Twentieth-century sea fiction has continued to center on the biological world and address the possibility of democratic brotherhood, but the issues were fundamentally changed by Darwin's theories. This book will be a valuable source for students and scholars of American literature and will interest readers of sea fiction.

American Sea Literature: Seascapes, Beach Narratives, and Underwater Explorations S. Yamashiro, 2014-07-31

Implementing a never before seen approach to sea literature, *American Sea Literature: Seascapes, Beach Narratives, and Underwater Explorations* explores the role of American maritime activities and their cultural representations in literature. Differentiating between the terrestrial and oceanic as concepts, Shin Yamashiro divides sea literature into three categories: literature on the sea, by the sea, and beneath the sea. Discussing both canonical works and new books on scuba diving, deep sea explorations, and surfing, this fascinating study recognizes sea literature's unique influence on American history. *The Sea and Nineteenth-Century Anglophone Literary Culture* Steve Mentz, Martha Elena Rojas, 2016-11-18 During the nineteenth century, British and American naval supremacy spanned the globe. The importance of transoceanic shipping and trade to the European-based empire and her rapidly expanding former colony ensured that the ocean became increasingly important to popular literary culture in both nations. This collection of ten essays by expert scholars in transatlantic British and American literatures interrogates the diverse meanings the ocean assumed for writers, readers, and thinkers on both sides of the Atlantic during this period of global exploration and colonial consolidation. The book's introduction offers three critical lenses through which to read nineteenth-century Anglophone maritime literature: wet globalization, which returns the ocean to our discourses of the global; salt aesthetics, which considers how the sea influences artistic culture and aesthetic theory; and blue ecocriticism, which poses an oceanic challenge to the narrowly terrestrial nature of green ecological criticism. The essays

employ all three of these lenses to demonstrate the importance of the ocean for the changing shapes of nineteenth century Anglophone culture and literature Examining texts from Moby Dick to the coral flower books of Victorian Australia and from Wordsworth's sea poetry to the Arctic journals of Charles Francis Hall this book shows how important and how varied in meaning the ocean was to nineteenth century Anglophone readers Scholars of nineteenth century globalization the history of aesthetics and the ecological importance of the ocean will find important scholarship in this volume **Modernity at Sea**

Cesare Casarino, 2002 At once a literary philosophical meditation on the question of modernity and a manifesto for a new form of literary criticism *Modernity at Sea* argues that the nineteenth century sea narrative played a crucial role in the emergence of a theory of modernity as permanent crisis In a series of close readings of such works as Herman Melville's *White Jacket* and Moby Dick Joseph Conrad's *The Nigger of the Narcissus* and *The Secret Sharer* and Karl Marx's *Grundrisse* Cesare Casarino draws upon the thought of twentieth century figures including Giorgio Agamben Louis Althusser Walter Benjamin Leo Bersani Gilles Deleuze Félix Guattari and Antonio Negri to characterize the nineteenth century ship narrative as the epitome of Michel Foucault's heterotopia a special type of space that simultaneously represents inverts and contests all other spaces in culture Elaborating Foucault's claim that the ship has been the heterotopia par excellence of Western civilization since the Renaissance Casarino goes on to argue that the nineteenth century sea narrative froze the world of the ship just before its disappearance thereby capturing at once its apogee and its end and producing the ship as the matrix of modernity **The Sea Voyage Narrative** Robert Foulke, 2013-10-11 From *The Odyssey* to Moby Dick to *The Old Man and the Sea* the long tradition of sea voyage narratives is comprehensively explained here supported by discussions of key texts

America's Ocean Wilderness Gary Kroll, 2008 Examines a handful of famous ocean explorers and naturalists including Jacques Cousteau Thor Heyerdahl and Rachel Carson among others to demonstrate how their work helped shape the way many Americans would think about and interact with the ocean **Monuments of the Black Atlantic** Joanne M.

Braxton, 2004 With Aldon Nielson the editors of this volume agree that the middle passage may be the great repressed signifier of American historical consciousness The essays collected here illustrate that the repressed memory of crossing lives not only in the academy in oral traditions and in the stone walls of slave fortresses but in the liturgy as well as the spiritual and religious practices throughout the African Diaspora Descendants of African slaves living in the wide Diaspora are bearers of an unforgetful strength that endures and endures manifesting itself in every aspect of culture Black writers artists and musicians in the New World have tested the limits of cultural memory finding in it the inspiration to speak the unspeakable **Men Alone** Jopi Nyman, 2022-02-28 This study examines masculinity and individualism in four American novels of the 1920s and 1930s usually regarded as belonging to the genre of hard boiled fiction The novels under study are *Red Harvest* by Dashiell Hammett *The Postman Always Rings Twice* by James M Cain *They Shoot Horses Don't They* by Horace McCoy and *To Have and Have Not* by Ernest Hemingway In this first full length study of gender in hard boiled fiction

the genre is discussed as a representation of the ideologies of masculinity and individualism Hard boiled fiction is located in its historical and cultural context and it is argued that the genre with its explicit emphasis on masculinity and masculine virtues attempts to reaffirm a masculine order The study argues that this emphasis is a counter reaction to more general changes in the gender relations of the period Indeed hard boiled fiction is argued to be an attempt to reconstruct a masculine identity based on anti modern values generally accepted in the cultural context of the genre

Hello Sailor! Paul Baker,Jo Stanley,2015-10-23 When gays had to be closeted ships were the only places where homosexual men could not only be out but also camp And on some liners to the sun and the New World queens and butches had a ball They sashayed and minced their way across the world s oceans Never before has the story been told of the masses These are the thousands of queer seafarers mainly stewards who sometimes even outnumbered the straight men in the catering departments of ships that were household names and the pride of the British fleet Hello Sailor uniquely shows what it was like to be queer at sea at a time when land meant straightness

The Valley of Cross Purposes Carol J. Frost PhD,2017-03-31 In the late 1800s Charles Nordhoff forged the shape of modern journalism and profoundly influenced both politicians andpolitics Principled activist investigative and a champion of the disenfranchised and poor he was more interested incharacter and results than in personality and credit And like the blacksmith wielding his hammer he left us the tangibleproducts of his labors but few details of himself With superb research illuminating insights and eloquent prose Carol Frost brings Nordhoff vividly to life both the man andhis extraordinary impacts on politics journalism government and public discourseimpacts that are still defining publiclife today Journalists historians and activists will find context and inspiration in this captivating and previously untold story a storythat in many important ways feels like it was written about the events and debates of our own time rather than those ofmore than 100 years ago

Rendered Obsolete Jamie L. Jones,2023-08-10 Through the mid nineteenth century the US whaling industry helped drive industrialization and urbanization providing whale oil to lubricate and illuminate the country The Pennsylvania petroleum boom of the 1860s brought cheap and plentiful petroleum into the market decimating whale oil s popularity Here from our modern age of fossil fuels Jamie L Jones uses literary and cultural history to show how the whaling industry held firm in US popular culture even as it slid into obsolescence Jones shows just how instrumental whaling was to the very idea of energy in American culture and how it came to mean a fusion of labor production and the circulation of power She argues that dying industries exert real force on environmental perceptions and cultural imaginations Analyzing a vast archive that includes novels periodicals artifacts from whaling ships tourist attractions and even whale carcasses Jones explores the histories of race labor and energy consumption in the nineteenth century United States through the lens of the whaling industry s legacy In terms of how they view power Americans are she argues still living in the shadow of the whale

A Man's Game John Dudley, 2004-04-08 Demonstrates how concepts of masculinity shaped the aesthetic foundations of literary naturalism *A Man's Game* explores the development of American literary naturalism as it relates to definitions of manhood in many of the movement's key texts and the aesthetic goals of writers such as Stephen Crane Jack London Frank Norris Edith Wharton Charles Chestnutt and James Weldon Johnson John Dudley argues that in the climate of the late 19th century when these authors were penning their major works literary endeavors were widely viewed as frivolous the work of ladies for ladies who comprised the vast majority of the dependable reading public Male writers such as Crane and Norris defined themselves and their work in contrast to this perception of literature Women like Wharton on the other hand wrote out of a skeptical or hostile reaction to the expectations of them as woman writers Dudley explores a number of social historical and cultural developments that catalyzed the masculine impulse underlying literary naturalism the rise of spectator sports and masculine athleticism the professional role of the journalist adopted by many male writers allowing them to camouflage their primary role as artist and post Darwinian interest in the sexual component of natural selection *A Man's Game* also explores the surprising adoption of a masculine literary naturalism by African American writers at the beginning of the 20th century a strategy despite naturalism's emphasis on heredity and genetic determinism that helped define the black struggle for racial equality

Sailor Talk Mary K. Bercau Edwards, 2021 Investigates the literary and cultural significance of sailor talk rethinking the nineteenth century sailor and sailor writer whose language articulated the rich and complex culture of seafarers in port and at sea and the foundational role of maritime language in the works of Herman Melville Joseph Conrad and Jack London

Shipwrecked Jamin Wells, 2020-10-07 Reframing the American story from the vantage point of the nation's watery edges Jamin Wells shows that disasters have not only bedeviled the American beach they created it Though the American beach is now one of the most commercialized contested and engineered places on the planet few people visited it or called it home at the beginning of the nineteenth century By the twentieth century the American beach had become the summer encampment of presidents a common destination for millions of citizens and the site of rapidly growing beachfront communities *Shipwrecked* tells the story of this epic transformation arguing that coastal shipwrecks themselves changed how Americans viewed used and inhabited the shoreline Drawing on a broad range of archival material including logbooks court cases personal papers government records and cultural ephemera Wells examines how shipwrecks laid the groundwork for the beach tourism industry that would transform the American beach from coastal frontier to oceanfront playspace spur substantial state and private investment alongshore reshape popular ideas about the coast and turn the beach into a touchstone of the American experience

Making Men in the Age of Sail Graeme J. Milne, 2024-06-15 Myths and stereotypes surrounding seafarers in the Age of Sail persist to this day Sailors were celebrated for their courage strength and skill yet condemned for militancy vice and fecklessness As sail gave way to steam sailing ship mariners became nostalgic symbols of maritime prowess and heritage representing a timeless heroic masculinity in an era

when the modernizing industrial world was challenging assumptions about gender class work and society Drawing on British seafaring memoirs from the late nineteenth century *Making Men in the Age of Sail* argues that maritime writing moulded the reading public's image of the merchant seaman Authors chronicled their lives as they grew from boy sailors to trained seafarers telling colourful tales of the men they worked with most never doubted that the sailing ship had made them better men Their testimony reinforced and preserved conservative perspectives on seafaring manhood as Britain's economic and technological priorities continued to evolve in the new steamship age Offering a gender analysis of the image of the seafarer *Making Men in the Age of Sail* brings the history of British sailors into wider debates about modernity and masculinity

Borderwaters Brian Russell Roberts, 2021-04-05 Conventional narratives describe the United States as a continental country bordered by Canada and Mexico Yet since the late twentieth century the United States has claimed more water space than land space and more water space than perhaps any other country in the world This watery version of the United States borders some twenty one countries particularly in the archipelagoes of the Pacific and the Caribbean In *Borderwaters* Brian Russell Roberts dispels continental national mythologies to advance an alternative image of the United States as an archipelagic nation Drawing on literature visual art and other expressive forms that range from novels by Mark Twain and Zora Neale Hurston to Indigenous testimonies against nuclear testing and Miguel Covarrubias's visual representations of Indonesia and the Caribbean Roberts remaps both the fundamentals of US geography and the foundations of how we discuss US culture
