The Search John Battelle, 2005 **Individual and Collective Memory Consolidation** Thomas J. Anastasio, Kristen Ann Ehrenberger, Patrick Watson, Wenyi Zhang, 2021-08-03 An argument that individuals and collectives form memories by analogous processes and a case study of collective retrograde amnesia We form individual memories by a process known as consolidation the conversion of immediate and fleeting bits of information into a stable and accessible representation of facts and events These memories provide a version of the past that helps us navigate the present and is critical to individual identity In this book Thomas Anastasio Kristen Ann Ehrenberger Patrick Watson and Wenyi Zhang propose that social groups form collective memories by analogous processes Using facts and insights from neuroscience psychology anthropology and history they describe a single process of consolidation with analogous not merely comparable manifestations on any level whether brain family or society They propose a three in one model of memory consolidation composed of a buffer a relator and a generalizer all within the consolidating entity that can explain memory consolidation phenomena on individual and collective levels When consolidation is disrupted by traumatic injury to a brain structure known as the hippocampus memories in the process of being consolidated are lost In individuals this is known as retrograde amnesia The authors hypothesize a social hippocampus and argue that disruption at the collective level can result in collective retrograde amnesia They offer the Chinese Cultural Revolution 1966 1976 as an example of trauma to the social hippocampus and present evidence for the loss of recent collective memory in mainland Chinese populations that experienced the Cultural Revolution

Gurus on E-business John Middleton, 2006 Evaluates thought leaders in e commerce This book explores the impact and significance of e business as illustrated by the work and thinking of a number of key players in the field Its aim is to be a guide for business people who are looking to make optimal and profitable use of e business as well as to students **PC World**, 2005 **The Google Story (2018 Updated Edition)** David A. Vise, Mark Malseed, 2005-11-15 The definitive bestselling account of the company that changed the way we work and live updated for the twentieth anniversary of Google s founding with analysis of its most recent bold moves to redefine the world and its even more ambitious plans for the future Moscow born Sergey Brin and Midwest born Larry Page dropped out of graduate school at Stanford University to as they said change the world through a powerful search engine that would organize every bit of information on the Web for free The Google Story takes you deep inside the company s wild ride from an idea that struggled for funding in 1998 to a firm that today rakes in billions in profits Based on scrupulous research and extraordinary access to Google this fast moving narrative reveals how an unorthodox management style and a culture of innovation enabled a search engine giant to shake up Madison Avenue clash with governments that accuse it of being a monopoly deploy self driving cars to forever change how we travel and launch high flying Internet balloons Unafraid of controversy Google is surging ahead with artificial intelligence that could cure diseases but also displace millions of people from their jobs testing the founders guiding mantra DON T BE EVIL

Praise for The Google Story The authors do a fine job of recounting Google's rapid rise and explaining its search business The New York Times An intriguing insider view of the Google culture Harvard Business Review An interesting read on a powerhouse company If you haven't read anything about one of today's most influential companies you should If you don't read The Google Story you're missing a few extra treats USA Today Fascinating meticulous never bogs down Houston Chronicle

Googled Ken Auletta, 2009-11-03 A revealing forward looking examination of the outsize influence Google has had on the changing media Landscape There are companies that create waves and those that ride or are drowned by them As only he can bestselling author Ken Auletta takes readers for a ride on the Google wave telling the story of how it formed and crashed into traditional media businesses from newspapers to books to television to movies to telephones to advertising to Microsoft With unprecedented access to Google's founders and executives as well as to those in media who are struggling to keep their heads above water Auletta reveals how the industry is being disrupted and redefined Using Google as a stand in for the digital revolution Auletta takes readers inside Google's closed door meetings and paints portraits of Google's notoriously private founders Larry Page and Sergey Brin as well as those who work with and against them In his narrative Auletta provides the fullest account ever told of Google's rise shares the secret sauce of Google's success and shows why the worlds of new and old media often communicate as if residents of different planets Google engineers start from an assumption that the old ways of doing things can be improved and made more efficient an approach that has yielded remarkable results Google will generate about 20 billion in advertising revenues this year or more than the combined prime time ad revenues of CBS NBC ABC and FOX And with its ownership of YouTube and its mobile phone and other initiatives Google CEO Eric Schmidt tells Auletta his company is poised to become the world's first 100 billion media company Yet there are many obstacles that threaten Google's future and opposition from media companies and government regulators may be the least of these Google faces internal threats from its burgeoning size to losing focus to hubris In coming years Google's faith in mathematical formulas and in slide rule logic will be tested just as it has been on Wall Street Distilling the knowledge accrued from a career of covering the media Auletta will offer insights into what we know and don't know about what the future holds for the imperiled industry

American Book Publishing Record ,2005 **Artificial Intelligence and the Future of Defense** Stephan De Spiegeleire,Matthijs Maas,Tim Sweijs,2017-05-17 Artificial intelligence AI is on everybody s minds these days Most of the world s leading companies are making massive investments in it Governments are scrambling to catch up Every single one of us who uses Google Search or any of the new digital assistants on our smartphones has witnessed first hand how quickly these developments now go Many analysts foresee truly disruptive changes in education employment health knowledge generation mobility etc But what will AI mean for defense and security In a new study HCSS offers a unique perspective on this question Most studies to date quickly jump from AI to autonomous mostly weapon systems They anticipate future armed forces that mostly resemble today s armed forces engaging in fairly similar types of activities with a still primarily industrial kinetic capability bundle that would increasingly be AI augmented The authors of this study argue that AI may have a far more transformational impact on defense and security whereby new incarnations of armed force start doing different things in novel ways The report sketches a much broader option space within which defense and security organizations DSOs may wish to invest in successive generations of AI technologies It suggests that some of the most promising investment opportunities to start generating the sustainable security effects that our polities societies and economies expect may lie in in the realms of prevention and resilience Also in those areas any large scale application of AI will have to result from a preliminary open minded on all sides public debate on its legal ethical and privacy implications The authors submit however that such a debate would be more fruitful than the current heated discussions about killer drones or robots Finally the study suggests that the advent of artificial super intelligence i e AI that is superior across the board to human intelligence which

many experts now put firmly within the longer term planning horizons of our DSOs presents us with unprecedented risks but also opportunities that we have to start to explore The report contains an overview of the role that intelligence the computational part of the ability to achieve goals in the world has played in defense and security throughout human history a primer on AI what it is where it comes from and where it stands today in both civilian and military contexts a discussion of the broad option space for DSOs it opens up 12 illustrative use cases across that option space and a set of recommendations for especially small and medium sized defense and security organizations *The Facebook Effect* David

Kirkpatrick,2010-07-01 IN LITTLE MORE THAN HALF A DECADE Facebook has gone from a dorm room novelty to a company with 500 million users It is one of the fastest growing companies in history an essential part of the social life not only of teenagers but hundreds of millions of adults worldwide As Facebook spreads around the globe it creates surprising effects even becoming instrumental in political protests from Colombia to Iran Veteran technology reporter David Kirkpatrick had the full cooperation of Facebook's key executives in researching this fascinating history of the company and its impact on our lives Kirkpatrick tells us how Facebook was created why it has flourished and where it is going next He chronicles its successes and missteps and gives readers the most complete assessment anywhere of founder and CEO Mark Zuckerberg the central figure in the company's remarkable ascent This is the Facebook story that can be found nowhere else How did a nineteen year old Harvard student create a company that has transformed the Internet and how did he grow it to its current enormous size Kirkpatrick shows how Zuckerberg steadfastly refused to compromise his vision insistently focusing on growth over profits and preaching that Facebook must dominate his word communication on the Internet In the process he and a small group of key executives have created a company that has changed social life in the United States and elsewhere a company that has become a ubiquitous presence in marketing altering politics business and even our sense of our own identity This is the Facebook Effect *American Business Since 1920* Thomas K. After the Software Wars Keith Curtis,2009 Computers are an advancement whose importance is comparable to the invention of the wheel or movable type While computers and the Internet have already changed many aspects of our lives we still live in the dark ages of computing because proprietary software is still the dominant model One might say that the richest alchemist who ever lived is my former boss Bill Gates Oracle founder Larry Ellison and Google co founders Sergey Brin and Larry Page are close behind Human knowledge increasingly exists in digital form so building new and better models requires the software to be improved People can only share ideas when they also share the software to display and modify them It is the expanded use of free software that will allow a greater ability for people to work together and increase the pace of progress This book will demonstrate that a system where anyone can edit share and review the body of work will lead not just to something that works but eventually to the best that the world can achieve With better cooperation among our scientists robot driven cars is just one of the many inventions that will arrive pervasive robotics artificial intelligence and much faster progress in biology all of which rely heavily on software Publisher

Alphabet Micky Lee,2019-05-14 Google is synonymous with searching but in this innovative new research volume Micky Lee explores how the Alphabet Corporation now the parent company of Google is more than just a search engine Using a political economic approach Lee draws on the concept of networks to investigate the growth of this key media player The establishment of the parent company Alphabet shows the company is expanding to other industries from equity investment to self driving cars This book first examines this history of expansion before delving into the economic political and cultural profiles of the corporation Lee ultimately finds that what makes Google powerful is not one genius idea but rather networks of people places and capital Alphabet The Becoming of Google is a compelling dive into the sometimes inscrutable world of Google ideal for students scholars and researchers interested in the fields of digital media studies the politics and economies of online media and the history of the internet

Artificial Intelligence and the Two Singularities Calum Chace, 2018-04-20 The science of AI was born a little over 60 years ago but for most of that time its achievements were modest In 2012 it experienced a big bang when a branch of statistics called Machine Learning and a sub branch called Deep Learning was applied to it Now machines have surpassed humans in image recognition and they are catching up with us at speech recognition and natural language processing Every day the media reports the launch of a new service a new product and a new demonstration powered by AI When will it end The surprising truth is the AI revolution has only just begun Artificial Intelligence and the Two Singularities argues that in the course of this century the exponential growth in the capability of AI is likely to bring about two singularities points at which conditions are so extreme that the normal rules break down The first is the economic singularity when machine skill reaches a level that renders many of us unemployable and requires an overhaul of our current economic and social systems The second is the technological singularity when machine intelligence reaches and then surpasses the cognitive abilities of an adult human relegating us to the second smartest species on the planet These singularities will present huge challenges but this book argues that we can meet these challenges and overcome them If we do the rewards could be almost unimaginable This book covers Recent developments in AI and its future potential The economic singularity and the technological singularity in depth The risks and opportunities presented by AI What actions we should take Artificial intelligence can turn out to be the best thing ever to happen to humanity making our future wonderful almost beyond imagination But only if we address head on the challenges that it will raise Calum Chace is a best selling author of fiction and non fiction books and articles focusing on the subject of artificial intelligence He is a regular speaker on artificial intelligence and related technologies and runs a blog on the subject at www.pandoras.brain.com Prior to becoming a full time writer and speaker he spent 30 years in business as a marketer a strategy consultant and a CEO

He studied philosophy at Oxford University where he discovered that the science fiction he had been reading since boyhood was simply philosophy in fancy dress

EU Competition Law, Data Protection and Online Platforms: Data as Essential Facility Inge Graef, 2016-10-17

All are agreed that the digital economy contributes to a dynamic evolution of markets and competition. Nonetheless, concerns are increasingly raised about the market dominance of a few key players. Because these companies hold the power to drive rivals out of business, regulators have begun to seek scope for competition enforcement in cases where companies claim that withholding data is needed to satisfy customers and cut costs. This book is the first focus on how competition law enforcement tools can be applied to refusals of dominant firms to give access to data on online platforms such as search engines, social networks, and e-commerce platforms, commonly referred to as the gatekeepers of the Internet. The question arises whether the denial of a dominant firm to grant competitors access to its data could constitute a refusal to deal and lead to competition law liability under the so-called essential facilities doctrine, according to which firms need access to shared knowledge in order to be able to compete. A possible duty to share data with rivals also brings to the forefront the interaction of competition law with data protection legislation, considering that the required information may include personal data of individuals. Building on the refusal to deal concept and using a multidisciplinary approach, the analysis covers such issues and topics as the following: data portability, interoperability, data as a competitive advantage or entry barrier in digital markets, market definition and dominance with respect to data, disruptive versus sustaining innovation, role of intellectual property regimes, economic trade-off in essential facilities cases, relationship of competition enforcement with data protection law, and data-related competition concerns in merger cases. The author draws on a wealth of relevant material, including EU and US decision-making, practice, case law, and policy documents, as well as economic and empirical literature on the link between competition and innovation. The book concludes with a proposed framework for the application of the essential facilities doctrine to potential forms of abuse of dominance relating to data. In addition, it makes suggestions as to how data protection interests can be integrated into competition policy. An invaluable contribution to ongoing academic and policy discussions about how data-related competition concerns should be addressed under competition law, the analysis clearly demonstrates how existing competition tools for market definition and assessment of dominance can be applied to online platforms. It will be of immeasurable value to the many jurists, business persons, and academics concerned with this very timely subject.
