changed the way we organize our thoughts about the world and how we work What are the search engine wars what do they portend for the future of search and who wins or loses To what extent does political control of search engines or the political influence of search engines affect how they are used misused and regulated Does the search engine help shape our identities and interactions with others and what implications does this have for privacy Informed members of the information society must understand the social contexts in which search engines have been developed what that development says about us as a society and the role of the search engine in the global information environment This book provides the perfect starting point
