Searching For Rural Development Labor Migration And Employment In Mexico:

Searching for Rural Development Merilee S. Grindle, 2019-01-24 Throughout the Third World rural people must leave their homes in ever greater numbers to seek temporary work in urban centers in distant rural areas or across international borders This temporary labor migration less an option than a necessity for many is symptomatic of rural stagnation and increasing economic dependence and is most prevalent in regions where the base for agricultural development is poor Searching for Rural Development addresses the critical question of how rural development strategies can help provide more secure livelihoods for the millions who are now unable to sustain themselves and their families in local communities Focusing on Mexico Merilee S Grindle examines how rural families adapt to the paucity of local employment opportunities by pursuing complex strategies of income diversification She assesses various options for creating jobs in rural and semirural areas and considers how recommended rural development policies can be implemented through the political process **Rural**

Development in Latin America Alain De Janvry, 1989 **The Challenge of Institutional Reform in Mexico** Riordan Roett, 1995 The Salinas administration s reforms in Mexico generated widespread attention and questions This book addresses those questions examining the impact of the recent reforms on the state s relations with key social and political actors and assessing reform initiatives **Reforming Mexico's Agrarian Reform** Laura Randall, 2016-09-16 This work

provides a survey and analysis of Mexico s agrarian reform covering topics such as the agricultural provisions of NAFTA The book also discusses the events in Chiapas that are crucial to Mexico s current political situation and the implications of reform for US Mexican trade *The Effects Of Receiving Country Policies On Migration Flows* Sergio Diaz-briquets, Sidney Weintraub, 2019-06-26 This book deals with migrant sending countries in the Western Hemisphere because that was the

Commission s mandate and because the bulk of undocumented immigrants into the United States come from Mexico and other countries of the Caribbean Basin Migration, Urbanization, and Development Richard E. Bilborrow, 1998 Internal migration and urbanization are key dimensions of the process of socioeconomic development The unprecedented movement of peoples within the borders of their own countries is one of the greatest transformations witnessed in the 20th century Policy analysts especially those from developing countries where internal migration can be felt at first hand view migration as one of the most important factors affecting the course of development It is within this context that UNFPA convened the Symposium on Internal Migration and Urbanization in Developing Countries in January 1996 in preparation for the United Nations World Conference on Human Settlements in Istanbul in June 1996 The final results of the symposium are found in this book This volume provides a better understanding at global level of internal migration issues of concern to policy analysts **Agriculture and Trade Policy in Latin America** Mary E. Transforming Agrarian Economies Thomas P. Tomich, Peter Kilby, Bruce F. Johnston, 2018-05-31 The world's 58 poorest countries are diverse in many respects but they share the characteristic of a labor force overwhelmingly dependent on agriculture Challenging the assumption that mass poverty and chronic hunger are insoluble problems this book systematically explores the multiple aspects of economic development in these countries which are home to 60 percent of the world's population The authors offer a broad based development strategy to raise incomes through agricultural productivity growth and expanded rural employment They present rich new information on the rural informal sector and on agriculture industry interactions and they analyze the impact of macroeconomic and social policies on the rural economy Policy instruments aimed at bringing about broad based development are carefully assessed from fiscal policy to development of new seeds and farm implements The book includes detailed case studies of countries that have seized or missed development opportunities Comparison of the successful economic transformations of Japan and the United States shows how key ideas which the authors call strategic notions have enabled policymakers to act with foresight Analyses of strategic choices in China the Soviet Union Taiwan Mexico Kenya and Tanzania also show how development strategies that emerge from the real world political economy reflect a mix of individual interests and strategic notions

Worlds in Motion : Understanding International Migration at the End of the Millennium Douglas S. Massey, Joaquin Arango, Graeme Hugo, Ali Kouaouci, Adela Pellegrino, 1999-01-28 At the end of the 20th century nearly all developed nations have become countries of immigration absorbing growing numbers of immigrants not only from developed regions but increasingly from developing nations of the Third World Although international migration has come to play a central role in the social economic and demographic dynamics of both immigrant sending and immigrant receiving countries social scientists have been slow to construct a comprehensive theory to explain it Efforts at theoretical explanation have been fragmented by disciplinary geographic and methodological boundaries Worlds in Motion seeks to overcome these schisms to create a comprehensive theory of international migration for the next century After explicating the various propositions and hypotheses of current theories and identifying areas of complementarity and conflict the authors review empirical research emanating from each of the world's principal international migration systems North America Western Europe the Gulf Asia and the Pacific and the Southern Cone of South America Using data from the 1980s levels and patterns of migration within each system are described to define their structure and organization Specific studies are then comprehensively surveyed to evaluate the fundamental propositions of neoclassical economics the new economics of labour migration segmented labour market theory world systems theory social capital theory and the theory of cumulative causation The various theories are also tested by

applying them to the relationship between international migration and economic development Although certain theories seem to function more effectively in certain systems all contain elements of truth supported by empirical research The task of the theorist is thus to identify which theories are most effective in accounting for international migration in the world today and what regional and national circumstances lead to a predominance of one theoretical mechanism over another The book concludes by offering an empirically grounded theoretical synthesis to serve as a guide for researchers and policy makers in the 21st century *The Global Restructuring of Agro-food Systems* Philip McMichael,1994 **Comparative Public Policy**

in Latin America Jordi Diez,Susan Franceschet,2012-11-23 This pioneering collection offers a comprehensive investigation into how to study public policy in Latin America While this region exhibits many similarities with the North American and European countries that have traditionally served as sources for generating public policy knowledge Latin American countries are also different in many fundamental ways As such existing policy concepts and frameworks may not always be the most effective tools of analysis for this unique region To fill this gap *Comparative Public Policy in Latin America* offers guidelines for refining current theories to suit Latin America s contemporary institutional and socio economic realities The contributors accomplish this task by identifying the features of the region that shape public policy including informal norms and practices social inequality and weak institutions This book promises to become the definitive work on contemporary public policy in Latin America essential for those who study the area as well as comparative public policy more broadly

Ambivalent Journey Richard C. Jones,2022-09-13 The changing political and economic relationships between Mexico and the United States and the concurrent U S debate over immigration policy and practice demand new data on migration

and its economic effects In this innovative study Richard C Jones analyzes migration patterns from two subregions of north central Mexico Coahuila and Zacatecas to the United States He analyzes and contrasts the characteristics of the two migrant populations and interprets the economic impacts of migration upon both home of migration upon both home areas Jones s findings refute some common assumptions about Mexican migration while providing a strong model for further research Jones s study focuses on the ways in which U S migration affects the lives of families in these two subregions Migrants from Zacatecas have traditionally come from rural areas and have gone to California and Illinois Migrants from Coahuila on the other hand usually come from urban areas and have almost exclusively preferred locations in nearby Texas The different motivations of both groups for migrating and the different economic and social effects upon their home areas realized by migrating form the core of this book The comparison also lends the book its uniqueness since no other study has made such an in depth comparison of two areas Jones addresses the basic dichotomy of structuralists who maintain that dependency and disinvestment are the rule for families and communities in sending areas and functionalists who believe that autonomy and reinvestment are the case of migrants and their families in home regions Jones finds that much of the primary literature is based on uneven and largely outdated data that leans heavily on two sending states Jalisco and Michoacan His fresh analysis shows that communities and regions of Mexico rather than families only account for differing migration patterns and differing social and economic results of these patterns Jones s study will be of value not only to scholars and practitioners working in the field of Mexican migration but also for its innovative methodology to anthropologists sociologists political scientists and historians whose interests include human migration patterns in any part of the world
