Strohmaier, 2009-03-28 David Strohmaier's long career as a firefighter has given him intimate knowledge of wildfire and its complex role in the natural world of the American West It has also given him rare understanding of the painful losses that are a consequence of fire Strohmaier addresses our ambivalence about fire and the realities of loss to it of life human and animal of livelihoods of beloved places He also examines the process of renewal that is yet another consequence of fire from the infusion of essential nutrients into the soil to the sprouting of seeds that depend on fire for germination to the renewal of species as the land restores itself Ultimately according to Strohmaier living with fire is a matter of choices of seeing the connection between loss on a personal scale and loss on a landscape scale in relationship with persons and in relationship to and with the land We must cultivate a longer perspective he says accepting that loss is a part of life and that humility and empathy and care are not only core virtues between humans but are also essential virtues in our attitudes and actions toward the earth *Drift Smoke* is a powerful and moving meditation on wildfire by someone who has seen it in all its terror and beauty who has lost colleagues and beloved terrain to its ferocity and who has also seen the miracle of new life sprouting in the ashes The debate over the role and control of fire in the West will not soon end but Strohmaier's contribution to the debate will help all of us better appreciate both the complexity of the issues and the possibilities of hitherto unconsidered solutions that will allow us to inhabit a place where fire is a natural and needed part of life     **Juggler of Worlds** Larry Niven, Edward M. *Beyond Chaco* Sarah A. Herr, 2016-12-15 During the eleventh and twelfth centuries A D the Mogollon Rim region of east central Arizona was a frontier situated beyond and between larger regional organizations such as Chaco Hohokam and Mimbres On this southwestern edge of the Puebloan world past settlement poses a contradiction to those who study it Population density was low and land abundant yet the region was overbuilt with great kivas a form of community level architecture Using a frontier model to evaluate household community and regional data Sarah Herr demonstrates that the archaeological patterns of the Mogollon Rim region were created by the flexible and creative behaviors of small scale agriculturalists These people lived in a land rich and labor poor environment in which expediency mobility and fluid social organization were the rule and rigid structures and normative behaviors the exception Herr s research shows that the eleventh and twelfth century inhabitants of the Mogollon Rim region were recent migrants probably from the southern portion of the Chacoan region These early settlers built houses and ceremonial structures and made ceramic vessels that resembled those of their homeland but their social and political organization was not the same as that of their ancestors Mogollon Rim communities were shaped by the cultural backgrounds of migrants by their liminal position on the political landscape and by the unique processes associated with frontiers As migrants moved from homeland to frontier a reversal in the proportion of land to labor dramatically changed the social relations of production Herr argues that when the context of production changes in this way wealth in people becomes more valuable than material wealth and social relationships and cultural symbols such as the great kiva must be reinterpreted accordingly *Beyond Chaco* expands our knowledge of the prehistory of this region and contributes to our understanding of how ancestral communities were constituted in lower population areas of the agrarian Southwest *The Oxford Companion to American Food and Drink* Andrew F.

Smith, 2007-05 Offering a panoramic view of the history and culture of food and drink in America with fascinating entries on everything from the smell of asparagus to the history of White Castle and the origin of Bloody Marys to jambalaya the *Oxford Companion to American Food and Drink* provides a concise authoritative and exuberant look at this modern American obsession Ideal for the food scholar and food enthusiast alike it is equally appetizing for anyone fascinated by Americana capturing our culture and history through what we love most food Building on the highly praised and deliciously browseable two volume compendium the *Oxford Encyclopedia of Food and Drink in America* this new work serves up everything you could ever want to know about American consumables and their impact on popular culture and the culinary world Within its pages for example we learn that Lifesavers candy owes its success to the canny marketing idea of placing the original flavor mint next to cash registers at bars Patrons who bought them to mask the smell of alcohol on their breath before heading home soon found they were just as tasty sober and the company began producing other flavors Edited by Andrew Smith a writer and lecturer on culinary history the *Companion* serves up more than just trivia however including hundreds of entries on fast food celebrity chefs fish sandwiches regional and ethnic cuisine food science and historical food traditions It also

Bourque, 2007-09-04 New England archaeology has not always been everyone's cup of tea only late in the Golden Age of nineteenth century archaeology as archaeology's focus turned westward did a few pioneers look northward as well causing a brief flurry of investigation and excavation Between 1892 and 1894 Charles C Willoughby did some exemplary excavations at three small burial sites in Bucksport Orland and Ellsworth Maine and made some models of that activity for exhibition at the Chicago World's Fair These activities were encouraged by E Putnam director of the Harvard Peabody Museum and head of anthropology at the Columbian Exposition Even earlier another director of the Peabody Jeffries Wyman spawned some real interest in the shellheaps of the Maine coast but that did not last very long Twentieth century New England archaeology specifically in Maine was for its first fifty years rather low key too with short lived but important activity by Arlo and Oric a Bates Harvard student prior to World War Later I another Massachusetts institution the Peabody Foundation at Andover took some minor but responsible steps toward further understanding of the area's prehistoric past *Archeological Investigations in Cochiti Reservoir, New Mexico* Jan V.
