Global Status Report on Road Safety 2018 World Health Organization, 2019-01-10 The Global status report on road safety 2018 launched by WHO in December 2018 highlights that the number of annual road traffic deaths has reached 1 35 million

Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians, cyclists, and motorcyclists, in particular those living in developing countries. The report suggests that the price paid for mobility is too high, especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives. World Report on Road Traffic Injury Prevention Marjorie Peden, 2008-09. Every day thousands of people are killed and injured on our roads. Millions of people each year will spend long weeks in the hospital after severe crashes, and many will never be able to live, work, or play as they used to do. Current efforts to address road safety are minimal in comparison to this growing human suffering. This report presents a comprehensive overview of what is known about the magnitude, risk factors, and impact of road traffic injuries, and about ways to prevent and lessen the impact of road crashes. Over 100 experts from all continents and different sectors, including transport, engineering, health, police, education, and civil society, have worked to produce the report. Charts and tables.
