Mathematical Structures of Social Mobility Raymond Boudon, 1973 **Red, Black, and Objective** Professor Sal Restivo, 2013-01-28 Drawing on the empirical findings generated by researchers in science studies and adopting Kropotkin's concept of anarchism as one of the social sciences Red Black and Objective expounds and develops an anarchist account of science as a social construction and social institution Restivo's account is at once normative analytical organizational and policy oriented in particular with respect to education With attention to the social practices and discourse of science this book engages with the works of Feyerabend and Nietzsche as well as philosophers and historians of objectivity to ground an anarchistic sociology of science Marx and Durkheim figure prominently in this account as precursors of the contemporary science studies perspective on the perennial question What is science The result is an approach to understanding the science and society nexus that is at once an extension of Restivo's earlier work and a novel adaptation of the anarchist agenda Red Black and Objective is an exploration by one of the founders of the science studies movement of questions in theory practice values and policy As such it will appeal to those with interests in science and technology studies social theory and sociology and philosophy of science and technology Look Both Ways, 1992-01-01 A collection of stories poems riddles games and

hands on activities to develop early math skills by demonstrating how math is all around us in everything we do *Giordano Bruno and the Geometry of Language* Arielle Saiber, 2017-03-02 Giordano Bruno and the Geometry of Language brings to the

fore a sixteenth century philosopher's role in early modern Europe as a bridge between science and literature or more specifically between the spatial paradigm of geometry and that of language Arielle Saiber examines how to invite what Bruno believed to be an infinite universe its qualities and vicissitudes into the world of language Bruno forged a system of figurative vocabularies number form space and word This verbal and symbolic system in which geometric figures are seen to underlie rhetorical figures is what Saiber calls geometric rhetoric Through analysis of Bruno's writings Saiber shows how Bruno's writing necessitates a crafting of space and is in essence a lexicon of spatial concepts This study constitutes an original contribution both to scholarship on Bruno and to the fields of early modern scientific and literary studies It also addresses the broader question of what role geometry has in the formation of any language and literature of any place and time

Postmodern Time and Space in Fiction and Theory Michael Kane, 2020-01-14 Postmodern Time and Space in Fiction and Theory seeks to place the contemporary transformation of notions of space and time often attributed to the technologies we use in the context of the ongoing transformations of modernity Bringing together examples of modern and contemporary fiction from Defoe to DeLillo Frankenstein to Finnegans Wake and theoretical discussions of the modern and the post modern the author explores the legacy of modern transformations of space and time under five headings The Space of Nature The Space of the City Postmodern or Most Modern Time The Time and Space of the Work of Art in the Age of Digital

Reproduction and Travel from Modernity to These five essays re-examine the meanings of modernity and its aftermath in relation to the spaces and times of the natural the urban and the media environment
