*James Cowles Prichard of the Red Lodge* Margaret M. Crump, 2025-06 Margaret M Crump offers the first thorough biography of British scientist and physician James Cowles Prichard 1786 1848 an intellectual giant in the developing human sciences a pioneering psychiatric theorist and Europe s leading anthropologist during the first half of the nineteenth century

*American Antiquities* Terry A. Barnhart, 2015 Writing the history of American archaeology especially concerning eighteenth and nineteenth century arguments is not always as straightforward or simple as it might seem Archaeology s trajectory from an avocation to a semi profession to a specialized self conscious profession was anything but a linear progression The development of American archaeology was an organic and untidy process which emerged from the intellectual tradition of antiquarianism and closely allied itself with the natural sciences throughout the nineteenth century especially geology and the debate about the origins and identity of indigenous mound building cultures of the eastern United States Terry A Barnhart examines how American archaeology developed within an eclectic set of interests and equally varied settings He argues that fundamental problems are deeply embedded in secondary literature relating to the nineteenth century debate about Mound Builders and American Indians Some issues are perceptual others contextual and still others basic errors of fact Adding to the problem are semantic and contextual considerations arising from the accommodating indiscriminate and problematic use of the term race as a synonym for tribe nation and race proper a concept and construct that does not in all instances translate into current understandings and usages American Antiquities uses this early discourse on the mounds to frame perennial anthropological problems relating to human origins and antiquity in North America

**Hoarding New Guinea** Rainer F. Buschmann, 2023-07 Hoarding New Guinea provides a new cultural history of colonialism that pays close attention to the millions of Indigenous artifacts that serve as witnesses to Europe s colonial past in ethnographic museums Rainer F Buschmann investigates the roughly two hundred thousand artifacts extracted from the colony of German New Guinea from 1870 to 1920 Reversing the typical trajectories that place ethnographic museums at the center of the analysis he concludes that museum interests in material culture alone cannot account for the large quantities of extracted artifacts Buschmann moves beyond the easy definition of artifacts as trophies of colonial defeat or religious conversion instead employing the term hoarding to describe the irrational amassing of Indigenous artifacts by European

colonial residents Buschmann also highlights Indigenous material culture as a bargaining chip for its producers to engage with the imposed colonial regime In addition by centering an area of collection rather than an institution he opens new areas of investigation that include non professional ethnographic collectors and a sustained rather than superficial consideration of Indigenous peoples as producers behind the material culture Hoarding New Guinea answers the call for a more significant historical focus on colonial ethnographic collections in European museums **Invisible Contrarian** Regna Darnell,
